## **President Biden's Bipartisan Infrastructure Law is Delivering in Louisiana**

As of July 2022

The Biden-Harris Administration has hit the ground running to implement the Bipartisan Infrastructure Law, and it is already delivering results for the people of Louisiana. To date, \$2.3 billion in Bipartisan Infrastructure Law funding has been announced and is headed to Louisiana with over 85 specific projects identified for funding. This year alone, Louisiana will receive more than \$1.8 billion for transportation to invest in roads, bridges, public transit, ports and airports and over \$100 million for clean water. And, as of today, more than 296,300 households across the state are receiving affordable internet due to the Bipartisan Infrastructure Law. Many more projects will be added in the coming months, as funding opportunities become grant awards and as formula funds become specific projects. By reaching communities all across Louisiana – including rural communities and historically underserved populations – the law makes critical investments that will improve lives for Louisianans and position the state for success.

**Roads and Bridges:** In Louisiana, there are 1,634 bridges and over 3,411 miles of highway in poor condition. The Bipartisan Infrastructure Law will rebuild our roads and includes the single largest dedicated bridge investment since the construction of the interstate highway system. Based on formula funding alone, Louisiana is expected to receive approximately \$5.9 billion over five years in federal funding for highways and bridges.

- **Announced funding to date:** To date, Louisiana has been allocated \$930 million in highway formula funding and \$219 million in dedicated funding for bridges in 2022.

**Internet:** High-speed internet is necessary for Americans to do their jobs, participate in school, access health care, and stay connected. Yet nearly 30% of Louisianans do not have an internet subscription. The Bipartisan Infrastructure Law invests \$65 billion to provide affordable, high-speed internet to every American. Louisiana will receive a

minimum allocation of at least \$100 million to help ensure high-speed internet coverage across the state. Additionally, experts estimate that as many as 869,000 households in Louisiana are eligible for the Affordable Connectivity Program, which cuts internet bills by up to \$30 per month, or \$75 for households on Tribal lands, and provides a one-time \$100 discount off a connected device. The Biden-Harris Administration is providing further cost savings by working with internet providers to offer high-speed internet plans that are fully covered by the Affordable Connectivity Program — meaning most eligible households can now get high-speed internet without paying a dime.

- **Progress to date:** About 296,300 households in Louisiana are enrolled in the Affordable Connectivity Program, with more signing up every day. Households can check their eligibility, sign up, and find fully covered internet plans at [GetInternet.gov](https://www.getinternet.gov).

**Water:** Currently, up to 10 million American households across the country connect to water through lead pipes and lack access to clean, safe drinking water. The Bipartisan Infrastructure Law represents the largest investment in clean drinking water in American history, including the first-ever dedicated federal funding to replace lead service lines and address dangerous PFAS chemicals.

- **Announced funding to date:** To date, approximately \$100 million is available in fiscal year 2022 to provide clean and safe water across the state. Of this funding, \$42 million is dedicated to lead pipe and service line replacement, with another \$27 million for safe drinking water investments that can also support lead pipe replacement in fiscal year 2022.

**Public Transit:** The Bipartisan Infrastructure Law makes the largest investment in public transit in U.S. history. Based on formula funding alone, Louisiana would expect to receive more than \$479 million over five years under the Bipartisan Infrastructure Law to improve public transit across the state.<sup>1</sup>This funding will expand healthy, sustainable transportation options in Louisiana, where non-white households are 4.3 times more likely to commute via public transportation and 1 in 4 transit vehicles in the state are currently past useful life.

- **Announced funding to date:** To date, Louisiana has been allocated \$91 million to improve public transportation options across the state in fiscal year 2022.

**Electric Vehicle Charging:** The Bipartisan Infrastructure Law invests \$7.5 billion to build the first-ever national network of electric vehicle chargers in the United States and is a critical element of President Biden's plan to address the climate crisis and support domestic manufacturing jobs. Through the National Electric Vehicle Infrastructure

---

<sup>1</sup> Transit formula funding amounts are subject to changes resulting from the 2020 census or from annual transit service data reported to FTA's National Transit Database.

Program alone, Louisiana should expect to receive more than \$73 million in formula funding over five years to support the expansion of electric vehicle charging in the state.

- **Announced funding to date:** Louisiana has been allocated \$11 million in 2022, pending the approval of the state's Electric Vehicle Charging Plan.

**Clean Energy & Power:** Power outages cost the U.S. economy more than \$70 billion annually. The Bipartisan Infrastructure Law makes a historic investment to upgrade our power infrastructure by making the grid more resilient and building thousands of miles of new transmission lines to deliver clean, affordable electricity. The law also makes a historic investment in clean energy technologies like advanced nuclear, clean hydrogen, and carbon capture, as well as a historic \$3.5 billion investment in weatherization to improve energy efficiency of homes and lower energy costs for impacted households by an average of \$372 per year.

- **Announced funding to date:** To date, approximately \$31 million has been allocated to Louisiana in 2022 for weatherization and \$8 million to help prevent outages and make the power grid more resilient in 2022. Additional grid funding will be made available in the coming months.

**Airports & Ports:** According to some rankings, no U.S. airports rank in the top 25 of airports worldwide. Our ports and waterways are in need of repair and reimagining too. The Bipartisan Infrastructure Law invests \$17 billion in port infrastructure and \$25 billion in airports to strengthen our supply chains, address maintenance backlogs, and reduce congestion and emissions near ports and airports – ultimately helping our country move goods and people more quickly and at lower cost.

- **Announced funding to date:** To date, Louisiana has received more than \$44 million in 2022 for airports and \$531 million in 2022 for ports.

**Resilience:** Millions of Americans feel the effects of climate change and extreme weather every day. More frequent hurricanes, wildfires, heat waves, floods, unprecedented power outages, and persistent droughts devastate our communities and threaten our infrastructure. In the last decade, Louisiana has experienced 36 extreme weather events, costing the state up to \$200 billion in damages. The Bipartisan Infrastructure Law makes a \$50 billion investment to bolster our resilience against pressing challenges like impacts of climate change, extreme weather events, and other hazards like cyberattacks.

- **Announced funding to date:** To date, approximately \$268 million has been allocated to Louisiana for infrastructure resilience in 2022.

**Legacy Pollution Cleanup:** Across the country, thousands of former industrial, chemical, and energy sites emit harmful pollutants into surrounding communities. These sites pose harms to health, welfare, and economic prosperity — and disproportionately impact communities of color: 26% of Black Americans and 29% of Hispanic Americans live within 3 miles of a Superfund site, a higher percentage than for Americans overall. The Bipartisan Infrastructure Law will deliver the largest investment in tackling legacy pollution in American history by cleaning up Superfund and brownfield sites, reclaiming abandoned mines, and capping orphaned oil and gas wells.

- **Announced funding to date:** To date, more than \$47 million has been allocated to Louisiana in 2022 for legacy pollution cleanup, such as capping orphaned oil and gas wells and reclaiming abandoned mine lands.

## LOUISIANA PROJECT SPOTLIGHTS

### ***Coastal Project Spotlight***

#### **Southwest Coastal Louisiana Hurricane Protection**

Overview: The U.S. Army Corps of Engineers awarded a \$125 million design-build contract to elevate structures in the current 25-year flood plain in Calcasieu, Cameron, and Vermillion parishes in the southwest.

See [here](#) for the full list of U.S. Army Corps projects announced earlier this year.

### ***Airport Project Spotlight***

#### **Baton Rouge Metropolitan Airport Passenger Boarding Bridge Replacement**

Overview: The Baton Rouge Metropolitan Airport is awarded \$5.2 million from DOT's Federal Aviation Administration for a passenger boarding bridge replacement project. This project will replace older boarding bridges with modern equipment that will be more energy efficient, reliable, and Americans with Disabilities Act compliant for individuals with access and functional needs.

See [here](#) for a map and list of the 2022 Airport Terminal awards announced in early July.

### ***Resilience Project Spotlight***

#### **Mermentau River Watershed**

Overview: The U.S. Army Corps of Engineers awarded \$12 million to Acadia Parish to perform damage repairs, install gates and new machinery, install electrical, make lighting improvements, and replace a guide wall.

See [here](#) for the full list of U.S. Army Corps projects announced earlier this year.

### ***Legacy Pollution Project Spotlight***

#### **Orphan Well Capping on Federal Lands**

Overview: Louisiana will be receiving \$15 million in funding through the Bipartisan Infrastructure Law from the Department of the Interior to support orphan well capping on federal lands. This funding will support the capping of 163 well sites across national parks and refuges.
