President Biden's Bipartisan Infrastructure Law is Delivering in South Dakota

As of February 2023

The Biden-Harris Administration has hit the ground running to implement the Bipartisan Infrastructure Law, and it is already delivering results for the people of South Dakota. To date, \$1.3 billion in Bipartisan Infrastructure Law funding has been announced and is headed to South Dakota with over 123 specific projects identified for funding. Since the Bipartisan Infrastructure Law passed, South Dakota will receive approximately \$944.6 million for transportation to invest in roads, bridges, public transit, ports and airports and roughly \$203 million for clean water. And, as of today, more than 15,000 households across the state are receiving affordable high-speed internet due to the Bipartisan Infrastructure Law. Many more projects will be added in the coming months, as funding opportunities become grant awards and as formula funds become specific projects. By reaching communities all across South Dakota – including rural communities and historically underserved populations – the law makes critical investments that will improve lives for South Dakotans and position the state for success.

Roads and Bridges: In South Dakota, there are 1038 bridges and over 2,031 miles of highway in poor condition. The Bipartisan Infrastructure Law will rebuild our roads and includes the single largest dedicated bridge investment since the construction of the interstate highway system. Based on formula funding alone, South Dakota is expected to receive approximately \$2.2 billion over five years in federal funding for highways and bridges.

- **Announced funding to date:** To date, \$844.7 million has been announced in South Dakota for roads, bridges, roadway safety, and major projects. This includes:
 - \$754.7 million in highway formula funding and \$90 million in dedicated formula funding for bridges in 2022 and 2023.

- \$21.4 million through the RAISE program and \$26.2 million through the Rural Surface Transportation Grant Program in 2022 and 2023.

Internet: High-speed internet is necessary for Americans to do their jobs, participate in school, access health care, and stay connected. Yet nearly 22% of South Dakotans do not have an internet subscription. The Bipartisan Infrastructure Law invests \$65 billion to provide affordable, high-speed internet to every American. South Dakota will receive a minimum allocation of at least \$100 million to help ensure high-speed internet coverage across the state. Additionally, experts estimate that as many as 123,000 households in South Dakota are eligible for the Affordable Connectivity Program, which cuts internet bills by up to \$30 per month, or \$75 for households on Tribal lands, and provides a one-time \$100 discount off a connected device. The Biden-Harris Administration is providing further cost savings by working with internet providers to offer high-speed internet plans that are fully covered by the Affordable Connectivity Program — meaning most eligible households can now get high-speed internet without paying a dime.

- **Progress to date:** To date, South Dakota has received \$2.6 million through the Broadband Equity, Access, and Deployment Program (BEAD) to help provide access to high-speed internet across the state. In addition, about 15,000 households in South Dakota are enrolled in the Affordable Connectivity Program, with more signing up every day. Households can check their eligibility, sign up, and find fully covered internet plans at [GetInternet.gov](https://www.getinternet.gov).

Water: The Bipartisan Infrastructure Law represents the largest investment in clean drinking water in American history, including the first-ever dedicated federal funding to replace lead service lines and address dangerous PFAS chemicals.

- **Announced funding to date:** To date, \$178 million has been announced to South Dakota to provide clean and safe water across the state and improve water infrastructure. This includes:
 - \$63 million available in fiscal years 2022 and 2023 to provide clean and safe water across the state through the Environmental Protection Agency. Of this funding, \$28.4 million is dedicated to lead pipe and service line replacement, with another \$18 million for safe drinking water investments that can also support lead pipe replacement in fiscal year 2022 and 2023.

Public Transit: The Bipartisan Infrastructure Law makes the largest investment in public transit in U.S. history. Based on formula funding alone, South Dakota would expect to receive approximately \$125 million over five years under the Bipartisan Infrastructure Law to improve public transit across the state.¹ This funding will expand

¹ Transit formula funding amounts are subject to changes resulting from the 2020 census or from annual transit service data reported to FTA's National Transit Database.

healthy, sustainable transportation options in South Dakota, where non-white households are 2.7 times more likely to commute via public transportation and 42% transit vehicles in the state are currently past useful life.

- **Announced funding to date:** To date, South Dakota has been allocated \$24 million to improve public transportation options across the state in fiscal year 2022 and 2023.

Clean Buses: The Bipartisan Infrastructure invests over \$10 billion for clean public transit and school buses. This includes a \$5 billion investment over the next five years to replace existing school buses with zero-emission and low-emission models. Use of clean school buses promotes cleaner air, reduced health risks, especially for children, and reduced greenhouse gas emissions. This year alone, funding from the Bipartisan Infrastructure Law will help double the number of clean public transit buses on America's roads.

- **Announced funding to date:** To date, South Dakota has been awarded \$3.6 million for the Environmental Protection Agency's Clean School Bus Program. In addition, communities in South Dakota were awarded \$1.1 million for clean transit buses and improved bus service through DOT's Low- and No- Emission Bus and Bus and Bus Facilities Program.

Electric Vehicle Charging: The Bipartisan Infrastructure Law invests \$7.5 billion to build the first-ever national network of electric vehicle chargers in the United States and is a critical element of President Biden's plan to address the climate crisis and support domestic manufacturing jobs. Through the National Electric Vehicle Infrastructure Program alone, South Dakota should expect to receive roughly \$29 million in formula funding over five years to support the expansion of electric vehicle charging in the state.

- **Announced funding to date:** South Dakota has been allocated \$10.6 million in 2022 and 2023 to build out a network of EV chargers across the state.

Clean Energy & Power: Power outages cost the U.S. economy more than \$70 billion annually. The Bipartisan Infrastructure Law makes a historic investment to upgrade our power infrastructure by making the grid more resilient and building thousands of miles of new transmission lines to deliver clean, affordable electricity. The law also makes a historic investment in clean energy technologies like advanced nuclear, clean hydrogen, carbon capture, and batteries, as well as a historic \$3.5 billion investment in weatherization to improve energy efficiency of homes and lower energy costs for impacted households by an average of \$372 per year.

- **Announced funding to date:** To date, approximately \$27.4 million has been allocated to South Dakota for clean energy, energy efficiency, and power in 2022 and 2023. This includes:

- \$14.4 million for weatherization;
- \$3.4 million through the State Energy Program;
- \$3.4 million through the Energy Efficiency and Conservation Block Grant Program;
- \$6 million to prevent outages and make the power grid more resilient. Additional grid funding will be made available in the coming months.

Airports: According to some rankings, no U.S. airports rank in the top 25 of airports worldwide. The Bipartisan Infrastructure Law invests \$25 billion in airports to replace and modernize airport infrastructure, which helps the US become more economically competitive globally, creates good jobs, and revitalizes and supports more efficient and enhanced traveler experience.

- **Announced funding to date:** To date, South Dakota has received approximately \$17.2 million in 2022 and 2023 for airports.

Ports and Waterways: Like airports, our ports and waterways are in need of repair and investment. The Bipartisan Infrastructure Law invests \$17 billion in port infrastructure to strengthen our supply chains, address maintenance backlogs, and reduce congestion and emissions near ports— ultimately helping our country move goods more quickly and at lower cost.

- **Announced funding to date:** To date, South Dakota has received roughly \$10.3 million in 2022 and 2023 for ports and waterways.

Resilience: Millions of Americans feel the effects of climate change and extreme weather every day. More frequent hurricanes, wildfires, heat waves, floods, unprecedented power outages, and persistent droughts devastate our communities and threaten our infrastructure. In the last decade, South Dakota has experienced 13 extreme weather events, costing the state up to \$10 billion in damages. The Bipartisan Infrastructure Law makes a historic investment to bolster our resilience against pressing challenges like impacts of climate change, extreme weather events, and other hazards like cyberattacks.

- **Announced funding to date:** To date, approximately \$33.2 million has been allocated to South Dakota for infrastructure resilience in 2022 and 2023 including \$10.1 million through the Army Corps of Engineers for flood mitigation.

Legacy Pollution Cleanup: Across the country, thousands of former industrial, chemical, and energy sites emit harmful pollutants into surrounding communities. These

sites pose harms to health, welfare, and economic prosperity — and disproportionately impact communities of color: 26% of Black Americans and 29% of Hispanic Americans live within 3 miles of a Superfund site, a higher percentage than for Americans overall. The Bipartisan Infrastructure Law will deliver the largest investment in tackling legacy pollution in American history by cleaning up Superfund and brownfield sites, reclaiming abandoned mines, and capping orphaned oil and gas wells.

South Dakota Project Spotlights

Waterways Project Spotlight

Big Bend Dam

Overview: The U.S. Army Corps of Engineers awarded \$5 million to go toward repairs for flood damages, replacement of relief well collector, seepage drains, and unwatering sump piping and valves at Big Bend Dam in Lake Sharpe, South Dakota.

See [here](#) for the full list of U.S. Army Corps projects announced.

Airport Project Spotlight

Chamberlain Municipal Airport Terminal

Overview: The Federal Aviation Administration awarded \$855,000 to Chamberlain Municipal Airport to construct a new general aviation terminal, replacing an existing mobile home that is currently being used as a terminal but does not meet the needs of the airport. The project will improve the experience of passengers and increase accessibility for passengers with disabilities.

See [here](#) for a map and list of the 2022 Airport Terminal awards announced.

Roads and Bridges RAISE Project Spotlight

US 12 Reconstruction

Overview: The U.S. Department of Transportation awarded South Dakota \$ 21.4 million for a project that will fund the regrading and reconstruction of approximately nine miles of US 12 in South Dakota between Morristown and Watauga. The project will widen the roadway to include six-foot-wide shoulders, replace a deteriorating bridge over Hay Creek, replace three large pipe culverts, and replace approximately 19 miles of right-of-way fencing. The project will improve safety and promote equity for residents by improving transportation access to the area. The project will provide benefits to

communities through improved travel time, reliable access to jobs, and upgraded infrastructure.

See [here](#) for information on RAISE projects that were announced.

Public Transportation Project Spotlight

Low or No Emission Bus program

Overview: The U.S. Department of Transportation awarded South Dakota Department of Transportation \$1 million to buy as many as eight low-emission propane buses, two propane conversion kits, and install a propane fueling station. The project will help reduce greenhouse gas emissions.

See [here](#) for more information on Low or No Emission Bus programs that were announced.
