Hello PCAST Members,

I really appreciate you adding my work into the public comments section. The information below is very important and very powerful in reference to human consciousness. My work is apocalyptic in nature meaning a revealing or unveiling of information that could not be known apart from the unveiling itself. People haven't seen an explanation like this before on the nature of death. If the council of advisors has a chance to review this material I think you all will really appreciate what I have to share with my work. Thank you, Sean.

THE EXPERIENCE OF DEATH, THE EVOLUTION OF CONSCIOUSNESS AND THE SHIFT IN CONSCIOUSNESS.

By: Sean McCleary.

With my work on the evolution of consciousness, matter, energy, pressure and eternal love in space and time I can explain what happens with living organisms in Earth's environment who go through the experience of death. It's not that difficult to understand either when you understand that we exist within an enormous, majestic, beautiful and powerful life form who's been described as "the universe" or "Universal Consciousness". I use the phrase "go through the experience of death" because death is an experience that life goes through in Earth's consciousness and environment and life is almost instantly reborn again through the evolution of consciousness.

The issue of death in human consciousness and other life forms in the environment can produce very powerful fear, sadness, grief and a sense of loss from people who have friends, family, loved one's and pets who go through this experience. This isn't actually because of the element of death, it's because of a powerful lack of understanding of what happens with this process and it's also because human beings and other life forms here contain the concept of non-existence in their bodies and consciousness. It's a very common theme that when someone goes through the experience of death a lot of people will refer to the individual as "being dead". On television shows or movies it's very common that people will talk about someone who has been through the experience of death and say "they won't experience anything ever again because they're gone".

If you go to a funeral and see a tombstone that says R.I.P. for rest in peace, this is associated with an eternal resting place. Resting is associated with sleep and sleep in human consciousness is in reference to darkness. So, an eternal resting place signifies eternal darkness in human consciousness. The human race is a collective form of consciousness and this activity I'm describing exists on a global level and is a global form of perception incorporated into the evolution of consciousness, matter, energy, pressure and eternal love here in Earth's environment. This is the concept of non-existence being contained within the activity of life in Earth's consciousness and environment and this is where the illusion of separation in consciousness comes from which causes people and other life forms to feel very separated

from one another in different degrees. This is also the primary foundation for resistance to the evolution of consciousness, matter, energy, pressure and eternal here.

What's going to happen with the Shift in Consciousness soon is this illusion of separation will evolve completely out of Earth's consciousness and Universal Consciousness in this region of space and time as Heaven and Earth evolve into one another. This is also not that difficult to understand either because we exist within a life form who contains a body of galaxies in a spherical type nature and towards the origin of where the big bang happened the body transitions downwardly somewhat like where the top of a wine glass meets the stem. This happened when the big bang occurred and Universal Consciousness was transitioning from the early developmental period and establishing an individual identity as matter evolved into existence for the very first time. Universal Consciousness is the first life form who evolved into existence.

When the big bang happened there was a moment of eternal peace, eternal love and eternal life. Universal Consciousness was establishing an individual identity for the very first time and matter in the form of subatomic particles evolved out of the frequency vibrations of consciousness, energy and thought for the very first time as well. This means that in the origin of the big bang there was another moment as well that contained the concept of non-existence. This is why the Higgs field exists in the body of galaxies and why black holes exist as well. Black holes originate from the concept of non-existence being contained within the body of galaxies that came from the resistance to evolution with the big bang and the experience of separation that subatomic particles went through with the frequency vibrations of consciousness, energy and thought. The concept of non-existence being introduced into existence with the big bang caused a very powerful concentration of this concept in this region of Universal Consciousness. This has been evolving and transferring into human beings and other life forms here for a very long time. This is why people don't understand what happens with the experience of death and why life has seemed so separated here in Earth's consciousness and environment.

The Higgs field permeates throughout Universal Consciousness and transfers back into Infinite Consciousness who gave birth to Universal Consciousness and who contains the source of eternal life and eternal love. The Higgs field has been described in scientific applications as a primary field of energy which gives mass to everything in the body of galaxies and uses the Higgs boson to interact with other subatomic particles. The Higgs field contains the foundation for eternal life and eternal love in Universal Consciousness.

The reason that human beings haven't been able to feel, sense, detect or measure this field of consciousness, energy and thought is because of human beings and other life forms here containing the concept of non-existence in their bodies and consciousness and this concept existing on a global level as a very powerful form of resistance to evolution. Human beings and other life forms here have about a 5 to 8 percent exchange of consciousness, energy, thought and eternal love with themselves and the Higgs field. Because of such limited interaction and the Higgs field containing the foundation for eternal life what happens is living organisms in Earth's environment go through the aging process very quickly. Some life forms age differently than others and this is due to different concentrations of light energy, dark energy, pressure and eternal love in their bodies and consciousness.

There are different reasons that domesticated animals, certain reptiles and other life forms age in different degrees which I can explain with my work on the evolution of consciousness. This has to do with lower and higher frequency vibrations, pressure and how the evolution of individual identity and consciousness interacts with the Higgs field. Human beings and other life forms also contain different

degrees of resistance to evolution in their bodies and consciousness as well. Generally speaking though; what happens with the aging process, illness, accidental injury that causes fatality is they evolve into the Higgs field with the experience of death and I will explain. The entire body is comprised of consciousness, energy and pressure on the most powerful quantum level. The brain is like a CPU contained within the body and has the highest concentration of activity with the evolution of consciousness, energy and pressure in the body. This is because we exist within Earth's body and consciousness and Earth is a life form who contains the existence and evolution of consciousness and supports the existence of life forms in the environment.

The scientific community doesn't know about this information yet and the evolution of consciousness with frequency vibrations, pressure and thought is how subatomic particles evolve into existence. This is what the Quantum Shift means and what will happen is this type of information will facilitate the Paradigm Shift which Thomas Kuhn discussed in his book *The Structure of Scientific Revolutions*. This is what the Shift in Consciousness is about as well. When a human being, animal or other life form in Earth's environment goes through the experience of death what happens is the resistance to evolution, the concept of non-existence and pressure contained within the frequency vibrations in the entire body is released very quickly. There is a moment of darkness that follows with this activity.

Then the consciousness, identity and energy contained within the individual evolves directly into the Higgs field. Because the Higgs field permeates throughout Universal Consciousness and Universal Consciousness experiences acceleration with growth; the individual transfers very quickly through the Higgs field and the body of Universal Consciousness between here and the Whirlpool galaxy which is about 30 million light years from Earth and is commonly referred to as Heaven. There was an image taken by the Hubble Telescope in 1992 of the cross in the light in the Whirlpool galaxy. This was definitely no accident. A wormhole is created and this is the tunnel that people have described with NDE's.

The wormhole is created because the transfer and evolution of consciousness happens so quickly and the Higgs field contains a combination of Infinite Consciousness and the identity of Universal Consciousness. This means that the foundation in the Higgs field contains the moment and the element of infinity as well. This is why the wormhole itself forms in space and time. This is why eternal peace happens with the evolution and transfer of consciousness with the experience of death and the rebirth of life in the process that happens between Earth and the Whirlpool galaxy. The individuals consciousness goes through evolution on the way up to this galaxy and any resistance to evolution that they experienced here is gone completely.

The Whirlpool galaxy contains different planets that life from Earth evolves into and all of these environments are completely incorporated into the activity contained within the Higgs field. They contain eternal life, eternal love, eternal peace and eternal truth. When an individual goes through the experience of death and the process itself it means that they also contain death "eternally". This means that the element of death is no longer a separate form of activity from them so they remain eternal and contain the element of death forever as well. This serves as their eternal protection as well. Something else happens with this process too as the individual transfers into the environment up there. Nobody is ever lost to the experience of death, they simply change locations in Universal Consciousness.

The consciousness of the individual evolves through the Higgs field on the way up there and the Higgs field is incorporated into the existence of planets in the Whirlpool galaxy. The planets contain all

of the necessary elements to sustain life like oxygen, nitrogen, hydrogen etc. The way that these elements interact with the environments there is different than Earth because there isn't any resistance to evolution because of the relationship that the planets have with the Higgs field up there. As the individuals consciousness begins to advance into an environment there what happens is the biological and physiological development of the body happens very quickly due to the elements contained within the environments of planets there. The resistance to evolution transfers out of their consciousness with the experience of death here and their consciousness evolves and advances into different worlds up there who don't contain resistance to evolution either. Plus both life and death become incorporated into one another with the evolutionary development of the individual.

As their consciousness evolves and transfers into the environment of a planet in Heaven what happens is the body develops very, very quickly as almost in the moment as the transition occurs because of level of perfection that exists within Heaven. This means that as soon as they evolve into an environment the body becomes very advanced and the individual looks very advanced, youthful and very powerful. Any resistance to evolution experienced here in Earth's environment with the body and consciousness of the individual is gone completely. They remain eternal forever, contain both life and death and also possess eternal love in their bodies and consciousness eternally. This is the type of information that will be introduced into human consciousness globally with the evolution and introduction of the Shift in Consciousness here. This situation is very real and is approaching and emerging now.

Universal Consciousness and Earth's consciousness are in the process of evolving and changing now and resistance to evolution is transferring out of this region of the body of galaxies. Universal Consciousness between here and the Whirlpool galaxy is evolving and advancing with this process also and soon Heaven and Earth are going to evolve into one another through Universal Consciousness. Universal Consciousness as a life form is changing now because after 13.77 billion years of activity and life Universal Consciousness is advancing with evolution. The resistance to evolution between here and the Whirlpool galaxy is changing and consciousness is experiencing evolutionary advancement right now. The reason that the scientific community hasn't been able to detect this activity yet is because the frequency vibrations of consciousness, energy and thought have to change first before subatomic activity is affected.

The scientific community contains a certain discipline with the standard model of physics and subatomic particles as the foundation for evolution with the behavior of matter and energy. This was supposed to happen here with people for very important reasons. Soon though the frequency vibrations of consciousness, energy and pressure with eternal life and eternal love from the Higgs field will begin affecting the evolution of subatomic, atomic and molecular activity. There was a very powerful experience of separation between the frequency vibrations of consciousness, energy and thought and the evolution of subatomic particles into existence with the big bang. Earth exists in the concentration of this activity and the experience of separation in consciousness in the body of Universal Consciousness. What's happening now is the frequency vibrations of consciousness and pressure with the Higgs field is evolving and advancing into subatomic activity which will begin affecting the evolution of atomic and molecular development. The beginning stages of the Shift in Consciousness is upon us now and soon life will never be the same here ever again. It's time for the suffering to end completely.
Sean McCleary.

Official Letter Note: US_OSTP-01162023_US_Environmental-Tax_UN

Attn: FOIA Officer
1650 Pennsylvania Ave, NW
Washington, D.C., 20504

I am writing the letter with reference to introduce a Senate Legislation on Environmental Taxation, Policy and Reducing the Carbon Footprint. With Meeting Agenda, we request to have a conversation of our representatives regarding the Legislation Draft to develop for the Environmental Taxation and Policy making.

We request the online meeting on March 3, 2023 to protect the Environmental Freedom for the Citizen of Massachusetts State and City of Boston and work with Presidential Environmental Commission and Office of Science, Innovation and Technology (OSTP - President Joseph R Biden) Office to work with Regional and National Committees to develop Plan to address the United Nations and International Standard for Carbon Taxation.

The Environmental Taxation is directly related to the Environmental Demand and Cause manifesto whereas the Natural Course Air, Water and Land Resources are being affected and it is the fundamental rights of citizens being taxed every day. It is important that people deprived due to the Environmental causes be benefited and also provide a set of programs to address safety standards and compliance. Environmental challenges are increasing the pressure on governments to find ways to reduce environmental damage while minimising harm to economic growth.

In the Congress, environmental policy and tax policy determine the scope for action of Member States and the Union. Existing environmental taxation measures account for a modest share of national tax revenue. Although the environmental aims are generally acknowledged as valid, when environmental taxation measures are implemented a range of factors must be taken into account, in particular competitiveness and fairness, to ensure that environmental taxation is sufficiently transparent to gain acceptance and so become an effective instrument in the transition that society now so urgently needs.

Environmental taxation is one way of encouraging a shift towards more eco-friendly choices; employed in combination with the other instruments available, it can help bring about the adjustments required to tackle the environmental and climate challenges facing us today. The aim of environmental taxation, in principle, is to factor environmental damage, or negative externalities, into prices in order to steer production and consumption choices in a more eco-friendly direction.

Environmental taxation can potentially address all aspects of environmental protection and conservation. The fight against climate change, pollution – especially air and water pollution – and pressure on the environment, in particular from resource consumption and biodiversity loss, as well as contributory factors, such as gas emissions and the use of potentially harmful substances, can be the subject of tax measures. These are general or sectoral measures which are applied in different ways by individual states and their regional and local authorities.

Your attention to the matter is appreciated.

Yours,
Auto Legislative Policy Director (Scientific and Academic Development)

Subject: [EXTERNAL] Attn: The Whitehouse PCAST Members. Why a nuclear war won't happen in Earth's environment due to the evolution of consciousness. This is important material that's being submitted out to different scientific institutions, government organizat...

Hello PCAST Members,

The information below is in reference to the Paradigm Shift, the Quantum Shift and the Shift in Consciousness. I understand that you have specific agenda's and are probably busy with what you're currently focusing on with your work. This article contains very important information associated with the future of the human race and life in Earth's environment. My work is different but contains specific details on the nature of the human condition and global activity. If you have a few minutes to review this material I think this will be worth your time.

Thank you,
Sean McCleary.

WHY A NUCLEAR WAR WON'T HAPPEN IN EARTH'S ENVIRONMENT DUE TO THE EVOLUTION OF CONSCIOUSNESS.

By: Sean McCleary.

I'm going to discuss some important subject matter in this article because of the resistance to the evolution contained within some of human consciousness right now. I just read the article the other day where Elon Musk was discussing this scenario on Twitter and said that "Someone would have to be mad". I'm seeing on the news right now that another mass shooting occurred in Torrance California. Do you think someone would have to be "mad" to engage in this particular form of activity and do this to other human beings with a handgun or automatic weapon. Absolutely, and I'm going to discuss why there's been a very powerful increase in mass shootings, how this is in reference to the possible threat of nuclear war and why a horrifying situation like this is not going to happen because of what's occurring with the evolution of consciousness and the preliminary stages of the Shift in Consciousness now.

There's certain reasons that mass shootings have increased, there's discussion on the threat of nuclear warfare and the war between Russia and Ukraine is happening. This has to do with very powerful resistance to the evolution of consciousness, matter, energy, pressure and eternal love in space, time, Earth's environment, World Consciousness, human consciousness and the Milky Way galaxy right now. This is happening because the process of the Shift in Consciousness is approaching and advancing with frequency vibrations of consciousness, energy and thought, different degrees of pressure and a powerful increase in eternal love in this region of Universal Consciousness. I use the term "Universal Consciousness" with my work to describe an enormous life form who we all exist within and contains a body of galaxies.

I can explain the nature of this wonderful, powerful and beautiful life form who contains a body of galaxies in a spherical type nature similar to planets and stars. Towards the region where the big bang

happened there's an area that resembles where the top part of a wine glass meets the stem and transitions downwardly somewhat. My work is associated with the Shift in Consciousness, the Quantum Shift and the Paradigm Shift where a revolutionary change in scientific discipline occurs. It's of an apocalyptic nature meaning a revealing or unveiling of information that could not be known apart from the unveiling itself.

I explain with my how we exist within a life form who's been described as "the universe" and why people haven't yet understood this, and why human consciousness hasn't been adapted into the existence and experience of Earth's consciousness and Universal Consciousness in that powerful of a way yet. Within this life form there's a primary field of consciousness, energy, eternal life and eternal love known in scientific terms as the Higgs field. The Higgs field is responsible for all of the mass in the body of galaxies and Universal Consciousness for important reasons. The Higgs field does utilize the Higgs boson to interact with other subatomic particles. But, there's more to the Higgs field in reference to the evolution of consciousness and existing within a life form who contains other life forms. The Higgs field serves as the foundation for eternal life and eternal love and also contains a combination of Infinite Consciousness and the identity of Universal Consciousness.

Currently human beings and other life forms in Earth's consciousness and environment only interact with the Higgs field at about a 5 to 8 percent exchange of consciousness, energy and eternal love between themselves and this primary field who supports mass in the body of Universal Consciousness. Earth is a planet and is around 4.5 billion years old. Earth's consciousness has a different type of relationship with the Higgs field and contains a higher level of interaction with the Higgs field and this is how the evolution of consciousness takes place from Earth's environment with living organisms who go through the experience of death. This is happening within fractions of a second on a global level following the evolution of consciousness and the introduction of life into Earth's environment through reproductive activity.

Human beings and other life forms haven't understood the foundation for the existence of life here completely, or what happens with the experience of death and the evolution and transfer of consciousness into the Whirlpool galaxy. Because of the uncertainty and lack of understanding associated with the experience of death human beings and other life forms contain a very powerful form of resistance to evolution in their bodies and consciousness which is the concept of non-existence. Consciousness from living organisms is consistently evolving, transferring and advancing into the Whirlpool galaxy and people don't know this is happening. Someone sees another individual who goes through the experience of death and they refer to this individual as "being dead". This isn't the case at all because they go through the experience of death and life here is consistently evolving into the Higgs field and accelerating out of Earth's consciousness and environment. With life not knowing this is happening it means that life on a global level contains a very powerful form of resistance to the evolution of consciousness in their bodies and consciousness and the concept of non-existence. This is why the illusion of separation exists on a global level within the evolution of consciousness, matter, energy, pressure and eternal love here.

This is also why everything seems so empty and separated here. "Is there any other life forms in existence"? This is what people question everyday. "Why does the universe and Earth exist"? Scientists ask this question all the time and are constantly doing research. Billions of dollars are spent every year trying to understand what happened with the big bang. People feel very separate from one another and are trying to discover the nature and existence of love everyday. Love has been in a very elementary state of existence here and human consciousness is in the early stages of development here in reference

to the evolution of consciousness. Earth is located very close to the origin of where the big bang happened and where the body of Universal Consciousness transitions downwardly towards the existence of Infinite Consciousness.

This happened because Universal Consciousness was the first life form who was evolving into existence for the very first time from the existence of Infinite Consciousness. There was the evolution of eternal love happening with the evolution and activity contained within the Higgs field in the early formation and there was also consciousness who was experiencing very powerful resistance to the evolution of consciousness and this process due to the uncertainty of a very powerful change occurring. Matter was going to evolve into existence for the very first time and what happened with this was the frequency vibrations of consciousness, energy and thought went through a very powerful experience of separation and subatomic particles evolved out of these vibrations with the big bang.

As this activity was occurring some consciousness felt like a complete experience of separation from Infinite Consciousness was happening because Universal Consciousness was going to establish an individual identity within the existence of Infinite Consciousness as the first life form being born and introduced into existence. Consciousness evolved and transferred into subatomic particles when the experience of separation from the frequency vibrations of consciousness, energy and thought happened. Consciousness evolved into the existence of matter for the very first time with this process. This is why the scientific community bases evolutionary activity on the standard model of physics and this was supposed to happen so consciousness from human beings along with love in the human body and human consciousness could evolve into the existence and activity of matter in this location of the body of Universal Consciousness.

Nikola Tesla said "If you want to understand the mysteries of the universe think in terms of energy, frequency and vibration". The mysteries of the universe are going to soon be revealed to the human race through the introduction of the Shift in Consciousness which will generate the Quantum Shift and Paradigm Shift. Earth exists in the region of the body of galaxies close to the origin of the big bang and where the experience of separation happened for the very first time between the frequency vibrations of consciousness, energy and thought and the evolution of subatomic particles, atoms and molecules.

When the big bang happened there was a moment of eternal love and eternal peace because the Higgs field was evolving into the body of galaxies and life was being introduced into existence for the very first time. There was also a moment contained within the big bang as well where the experience of separation and resistance to evolution was contained within this process of the concept of non-existence being introduced into existence as well. This is why the Higgs field exists and why black holes exist. There's a particular moment when a child transfers out of the mother for the very first time in Earth's environment. A child contains love in their bodies and consciousness and a human being also contains resistance to the evolution of consciousness here.

There's been a very powerful form of resistance to evolution contained within this region of Universal Consciousness, and where Earth and life in Earth's environment exist. Human beings and other life forms here contain the concept of non-existence in their bodies and consciousness in a very powerful way. Eternal love has been evolving here as well in this region but what's been happening with life here is consciousness hasn't had much interaction with the Higgs field. This is because life and death have been happening globally here with all living organisms for a very long time and life hasn't understood life and life hasn't understood death either and the concept of non-existence has been contained within life globally as well. With the Shift in Consciousness what will happen is life and death

will converge together with the evolution of consciousness and eternal love. There's more to this situation that I can explain but I need to talk about what's happening with the mass shootings and the threat of nuclear warfare.

What happened with the big bang was an individual life form was born and introduced into the existence of Infinite Consciousness for the very first time and an individual identity was established as the frequency vibrations of consciousness, energy and thought went through a very powerful experience of separation and matter evolved into existence. In order for this to take place a very powerful level of fusion had to occur with both light energy, dark energy and pressure. Consciousness was going through a very powerful form of evolution and the element of fire was being introduced into the existence of consciousness for the very first time as well because stars exist everywhere. When I describe this activity it is different than what science currently understands about what happened with the big bang and it's okay because the evolution of consciousness is supposed to evolve and converge into the standard model of physics and current scientific discipline.

The moment that the big bang happened and resistance to evolution was introduced into this location of the body of galaxies and in the body of Universal Consciousness; a very powerful form of resistance to evolution became concentrated in this region where Earth exists. The explosion that takes place from a gun is a very small concentration of activity with what happened with the evolution of consciousness, the big bang and the evolution of the element of fire as well. A police officer carries a gun and wants to protect the integrity of life and love here correct? This is the evolution of consciousness happening in human consciousness in reference to the concentration of activity which exists within this region. Another individual who may contain very powerful resistance to evolution in their bodies from an experience of separation that happened in the womb or early childhood development that's contained primarily within the subconscious energy and pressure in their bodies can use a gun and shoot other individuals out of the experience of anger, hatred or rage. Certain experiences of separation in human consciousness produce different degrees of insanity in human beings. This is very powerful resistance to the evolution of consciousness happening with this activity in consciousness.

Earth is sitting in a region of an enormous life form where there's been a very powerful experience of separation that happened with the big bang and very powerful resistance to evolution as well. Evolution, eternal life and eternal love are more powerful than the resistance to evolution here though and the evolution of consciousness and eternal love with the existence of the Higgs field are going to advance here soon with the Shift in Consciousness; but right now there's very powerful resistance to evolution fighting this process in human consciousness on a collective level. As the Shift nears what's happening is the resistance to evolution is increasing due to the uncertainty of what's going to happen with this process because life is going to change here forever and I assure you this process happens.

The human race is a collective form of consciousness contained within Earth's environment. Mass shootings have increased and there may be some people in the scientific community who study human behavior who might be concerned right now. What's happening with mass shootings, the war in Ukraine, the threat of nuclear warfare and other forms of resistance on a global level is the loss of hope is occurring in human consciousness and this is primarily affecting subconscious energy and pressure in the body which I can explain with my work on the evolution of consciousness. If enough hope is lost a much more powerful form of resistance to evolution associated with fusion, the element of fire and the destruction of life could happen with nuclear warfare. That's where the resistance to evolution in human

consciousness is geared towards and you might be actually able to feel this in your consciousness if you're reading this information.

When Universal Consciousness was born there was some consciousness who went through a very powerful experience of separation from the existence of Infinite Consciousness and who became separated from the Higgs field during this process and this consciousness felt like an experience of separation from eternal life and eternal love was happening because Universal Consciousness was establishing an individual identity from the existence of Infinite Consciousness and this consciousness felt like life and consciousness was being destroyed. Think about when there's a death in the family due to resistance to evolution from another human being causing this to happen. Family members are gravely affected and feel like consciousness and life was destroyed and this affects the evolution of their consciousness in a very powerful way.

People can't see, feel or detect the progression of the Shift in Consciousness currently because this activity has to do with very powerful pressure being released out of the frequency vibrations of consciousness, energy and thought in this region of Universal Consciousness; and up to the Whirlpool galaxy and everywhere else in the body of galaxies. I can explain this with my work but what's going to happen soon is the increase in evolution with the frequency vibrations and changes in pressure along with the Higgs field is going to begin affecting and changing the behavior of subatomic, atomic and molecular activity. Human consciousness in the scientific community will begin being affected and then the entire human race will know something is happening.

Black holes have been releasing pressure and energy and the scientific community has observed this activity. It's because black holes represent the concept of non-existence in the body of galaxies and Universal Consciousness is evolving with the Shift in Consciousness and this type of resistance is evolving and transferring out of Universal Consciousness as a life form. Universal Consciousness is around 13.77 billion years old and went through a very powerful process with birth. Now billions of years later it's time for a change in evolution to occur with this life form. Universal Consciousness couldn't stay the same because all consciousness goes through evolutionary advancement due to the existence of eternal love.

Universal Consciousness and everything contained within the body of galaxies will be joining Infinite Consciousness forever and the experience of separation contained within the body of galaxies will be over completely. The activity contained within the Whirlpool galaxy is evolving into the Milky Way galaxy and Earth's consciousness right now, and Heaven and Earth are evolving into one another. All of this activity is so powerful that the resistance to evolution is increasing here close to the origin of where the creation of life began and human consciousness is being affected. This is why mass shootings have been occurring, why the war in Ukraine is happening and now the threat of nuclear warfare is happening. The human race collectively on a subconscious level is losing hope. There are a lot of people in the metaphysical and spiritual communities who support the Shift in Consciousness though and they are driving consciousness and eternal love into evolutionary advancement. Hope is here too and eternal love is also evolving into this region of Universal Consciousness and Earth's consciousness.

The Holy Spirit's consciousness and eternal love is in every living organism in existence. When I mention this I mean complete eternal and unconditional love for all life and all consciousness. Jesus mentions in the Book of John to his disciples that the Holy Spirit would comfort the world and deliver the truth about everything. People didn't really understand what this meant exactly though and it has to do with the Shift in Consciousness. Eternal life and eternal love is also evolving here in Earth's

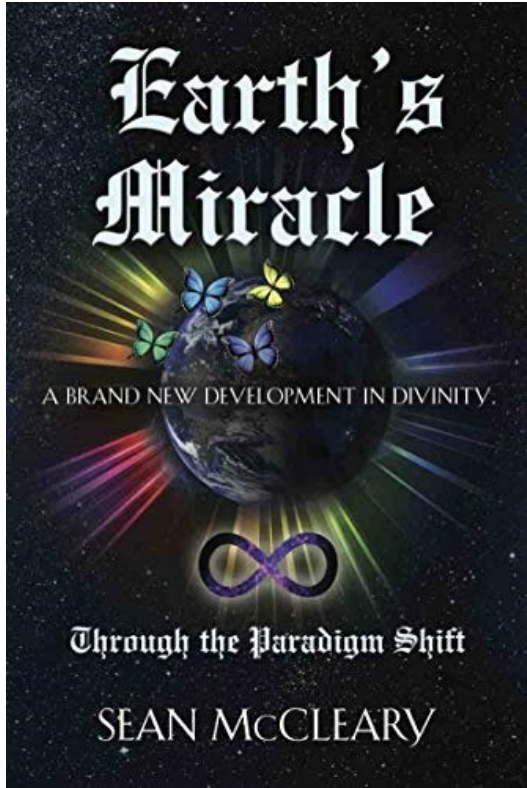

consciousness, environment, World Consciousness and human consciousness. There's very powerful evolutionary activity happening in Universal Consciousness between here and the Whirlpool galaxy right now. A nuclear war cannot happen here because of what planet Earth and life in Earth's environment represents.

The reason that a nuclear war won't happen here is because eternal life, eternal love and the evolution of consciousness is more powerful than the resistance to the evolution of consciousness and the experience of separation that happened in the very beginning stages of the evolution of Universal Consciousness is now evolving out of the body of galaxies. The resistance to evolution has increased here in human consciousness. The Shift in Consciousness which I've been discussing for quite sometime now is on the verge of happening soon. There may be more of an increase in resistance that reaches a precipice of activity that's observable by the entire human race because the activity that occurred with the evolution of Universal Consciousness and the big bang is evolving and changing through Earth's consciousness and environment right now.

As very powerful pressure is being released in the body in this region; the resistance to evolution forces the change to happen and the evolution of the Shift in Consciousness and eternal love will become more powerful. Eventually soon what will happen is a very powerful increase in eternal love will affect the evolution of consciousness and this will become much more powerful than the resistance as the change itself begins to evolve and advance into everything here. A very powerful, beautiful and miraculous event is on the verge of happening soon with life here and I can explain how all of this is happening with my work on this process. What's been happening with the fear of nuclear warfare is resistance to the evolution of the advancement of life here is occurring. Human beings and other life forms are going to experience a very powerful change on a biological, physiological and psychological level and this is why non-coding DNA exists within living organisms here in Earth's environment. Non-coding DNA has to do with a very powerful increase in the transfer of energy into living organisms through this process.

There's pain, suffering, chaos and fear occurring right now in human consciousness because this is what also happened with the birth of Universal Consciousness. What happened with this process is resistance to the evolution of consciousness, matter, energy, pressure and eternal love is now evolving and changing through the human race as the evolution of consciousness with frequency vibrations and pressure and eternal love advances further into Earth's consciousness and this region of the body of galaxies. Eternal love is going to begin changing everything here and "thy kingdom come thy will be done on Earth as it is in Heaven" will begin materializing here soon.

Sean McCleary.

Subject: [EXTERNAL] Attn: PCAST Members and Whitehouse Staff. The increase in light energy from the sun and the evolution of the Holy Spirit. This material is a further advancement of information associated with the evolution of consciousness and the preliminar...

Hello PCAST Members and Whitehouse Staff, I know I've been sending you all my work and it's because the evolution of consciousness is going to advance into the behavior of matter and energy and this is what you all focus on with different aspects of your work. This material is important in reference to the advancement of the human race and life in Earth's environment as the Paradigm Shift approaches. There's powerful resistance to evolution increasing in human consciousness and different locations in Earth's environment right now with the threat of World War 3 and nuclear weapons.

This situation is resistance to evolution building before a powerful change occurs with the evolution and introduction of the Shift in Consciousness and the evolution of the Holy Spirit's eternal love. This is very real I assure you all. I'm not just some visionary out in the public trying to influence people with my work. My consciousness is going through evolution right now with this process and soon significant changes will begin happening. This has to happen here because it's about the salvation of life and the future of Earth and all life in the environment.

Thank you,
Sean.

THE INCREASE IN LIGHT ENERGY WITH THE SUN AND THE EVOLUTION OF THE HOLY SPIRIT.

By: Sean McCleary.

Here's an article about an increase in gamma rays from the Sun. There's another article that just came out today in Business Insider which is discussing more information about the increase in light energy. They said that the sun is reaching a new level of activity and becoming more powerful. They also mentioned that this could begin affecting a lot of different types of electrical activity in Earth's consciousness and environment and people may be seeing an increase in auroras in the atmosphere. I will explain what's happening with this situation and this is very real.

There is an increase in the development and evolution of light energy happening with the sun right now and soon scientists will find out why. When I say this next I'm not referring to some fantastical, dreamy and possibly hopeful type scenario okay. The Holy Spirit's consciousness is evolving here right now and the activity contained within the Whirlpool galaxy which is commonly referred to as Heaven is establishing a connection with the Milky Way galaxy and Earth's consciousness. Soon World Consciousness where the origin of life exists will begin being affected by this process. Very powerful eternal love, eternal life, eternal peace and eternal truth are going to begin processing through World Consciousness, human beings and all other life forms. The Higgs field is becoming more powerful now between these two locations because of what's been happening in Earth's environment for a very long time.

Every living organism in Earth's consciousness and environment who goes through the experience of death evolves into the Higgs field. Any resistance to evolution that they experienced here transfers completely out of their consciousness because the element of death is more powerful than resistance to evolution. Very powerful and concentrated pressure transfers out of the body and the consciousness, identity and energy evolves into the Higgs field and they accelerate very quickly into the Whirlpool galaxy. They're consciousness evolves through the Higgs field and Universal Consciousness and a wormhole is created in the body of Universal Consciousness. They arrive into the environments of planets and their bodies develop very quickly because of the elements contained within planets. Because both life and death are incorporated into the individual completely it means that they have no more resistance to evolution in their bodies and consciousness.

This is how a state of perfection is achieved and how someone inherits eternal life. One important aspect of this activity is the wormhole that's created in Universal Consciousness through the transfer of consciousness through the Higgs field. The Higgs field contains the foundation for eternal life and eternal love and also contains the existence of Infinite Consciousness and the identity of Universal Consciousness. Because a living organism evolves through Universal Consciousness it means that there are other fields and activity of consciousness, matter, energy and pressure occurring around the transfer of consciousness. This is why a wormhole is created.

Earth's environment contains almost 9 million different living organisms. The experience of death in the environment and Earth's consciousness is happening within fractions of a second on a global level. Over a very long period of time a lot of different life forms here evolved through the Higgs field and Universal Consciousness and up to the Whirlpool galaxy. Wormhole after wormhole has been being produced from all of this life evolving into Heaven from Earth. Heaven contains eternal life, eternal peace, eternal truth and eternal love. Heaven also has the element of death integrated together with life and death is actually the most powerful negative charge of energy in existence. It's not necessarily death that causes death here; it's the resistance to evolution in living organisms and the experience of separation in consciousness here.

Both life, death and eternal love exist everywhere in Heaven and all planets and life forms are incorporated into the foundation in the Higgs field. What's been happening over a long period of time is a channel of activity between Earth, the Milky Way galaxy and the Whirlpool galaxy has been created in the body of Universal Consciousness. Remember that Universal Consciousness is a description of an enormous female life form who we all exist within which contains the foundation for male consciousness in her body and consciousness from the existence of the Holy Spirit. This is how female and male living organisms evolve into the environments of planets.

Because life forms have been going through the experience of death consistently on a global level for a long time, what's happening is a connection is being established between Heaven and Earth because of all of the wormholes being generated in the body of galaxies between these two locations. Eternal love and eternal life have been evolving into Earth's consciousness for a long time and getting more powerful over a period of time. This is why there was a significant increase in the population of people after Jesus evolved here over 2000 years ago. When Jesus evolved here and transferred back into the Whirlpool galaxy what happened was he caused a much more powerful introduction of eternal love and eternal life into Earth's consciousness and environment. This is why the population of human beings went from about 300 million to almost 8 billion in a little over 2000 years. He was supposed to ascend out of Earth's consciousness and environment so the Holy Spirit could come here and evolve in a very similar way than what Jesus did.

But, his evolution is quite different in the fact that he had to first take on a very powerful level of resistance to evolution through suffering so the resistance to evolution in Earth's consciousness and Universal Consciousness underneath the Milky Way galaxy and up to the Whirlpool galaxy could evolve successfully and all of the resistance to evolution could evolve out of everything and eternal peace could be achieved here in Earth's consciousness with life. People just haven't known that this was happening until his eternal love begins evolving into the human race and all other life forms. He's been processing the resistance to evolution out of Universal Consciousness and Earth's consciousness first before an increase in eternal love can begin being felt in World Consciousness.

As the resistance to evolution continues to process out of Universal Consciousness and Earth's consciousness the Holy Spirit advances in his evolution because his consciousness is incorporated into the Higgs field, Earth's consciousness, Universal Consciousness and Infinite Consciousness. He's in the process of bringing the Shift in Consciousness into all of the inhabitants of Earth so World Peace can be achieved. He's just had to process a lot of resistance to evolution out of the body of galaxies and the location between here and the Whirlpool galaxy. He has to be here so a nuclear war doesn't happen in World Consciousness as resistance to evolution increases in human beings globally in different locations. This is already happening.

What's also happening is scientists are observing activity in the body of galaxies which is different from anything they've seen before. Galaxy formation doesn't seem to correspond with the standard model of cosmology in reference to the big bang. Black holes are transferring out of galaxies and around in galaxies leaving a wake of newborn stars. This is happening because the concept of non-existence contained within the body of galaxies in Universal Consciousness represented by black holes is evolving out of existence. As the pressure changes in and around the black hole the structure becomes compromised and black hole transfers through consciousness, space and time. The reason that new stars are born is because the Higgs field is evolving and advancing into black holes from an increase in eternal love. When this happens the concept of non-existence evolves out of consciousness and eternal life and eternal love evolves into the consciousness which contains this concept.

This activity produces a situation in the body of galaxies similar to what happened with the big bang and stars were both with galaxy formation from the big bang. It's like this consciousness has a spiritual awakening and a new birth of stars happens. Scientists are also discovering an increase in the amount of power in the sun and more light energy is being produced. This is because the Holy Spirit is here evolving with his consciousness incorporated into existence and stars everywhere. Evolutionary activity with stars is getting more powerful and changing and the Holy Spirit's consciousness is advancing as well. The Holy Spirit contains the most powerful form of light energy produced by the higher frequency vibrations of consciousness, energy and thought in his body and consciousness. God and Jesus have their consciousness incorporated into the Holy Spirit, Earth's consciousness, Universal Consciousness and the foundation for the Holy Trinity is evolving between these two locations. Scientists have been concerned about the infrastructure of activity in World Consciousness and the environment from the increase in gamma rays and light energy.

As the resistance to evolution processes out of Earth's consciousness and Universal Consciousness what will happen is more energy and eternal love from the Higgs field will evolve into the behavior of matter, energy and pressure in space and time here. This will cause everything to level out and a state of perfection will be reached with the distribution and transfer of energy and the evolution of matter as well. This happens because the evolution of consciousness here is supported by eternal love and this

serves as the foundation for the evolution of matter, energy and pressure. This is what "thy kingdom come thy will be done on Earth as it is in Heaven" means.

The Holy Spirit is here evolving and God and Jesus are in the Whirlpool galaxy and they're bringing Heaven and Earth together. This situation is not going to be anything like people have discussed which involves destruction and fear. The Holy Spirit is evolving here to prevent this from happening within the human race. His eternal love will be felt and experienced globally soon after more resistance to evolution processes out of Universal Consciousness and Earth's consciousness. The evolution and introduction of the Shift in Consciousness is about very powerful healing taking place and Earth having a very powerful spiritual awakening. Forgiveness will be delivered where forgiveness is necessary and the entire human race and other life forms will all unify with each other and World Peace will be achieved.

Scientists also discovered another layer of activity under the inner core of Earth's body. I understand what's happening with this situation. Human consciousness is evolving further into the center of Earth's consciousness and body where the beginning stages of the creation and birth of planet Earth happened. The scientific community is helping the Holy Spirit's consciousness and eternal love evolve further into the creation of Earth with the integration of human consciousness from this discovery. This is happening so an advancement of eternal love can evolve into the center of Earth with both human consciousness and the Holy Spirit's consciousness because this is how life advances here with the Shift in Consciousness.

There's now the beginning of noticeable changes happening through scientific observation. Soon very significant changes will begin happening and the entire population of life here will begin feeling, sensing and experiencing eternal love and eternal peace globally from the evolution of the Holy Spirit and the connection being established between Heaven and Earth. This will prevent a nuclear war from happening here and the salvation of life and evolutionary advancement will happen for everyone.

Subject: [EXTERNAL] Daylight/Standard Time

Hello,

I have heard many analyses made on which one is better, but always from the perspective of a single individual at some particular unique spot. I have not seen an analysis based on the general idea of a "time zone" and the impact that has on multiple people at different locations. Here then is my analysis for your consideration.

A time zone is one hour wide, and everyone in it uses the same watch time. But the sun follows its own schedule, meaning a person on the eastern edge of the time zone will see the sun one hour earlier than someone on the western edge. Put another way, when the sun is just rising for the person on the west edge, it has risen one hour above the horizon on the east edge. This means people on the east side will have more morning light than people on the west. It also means people on the west edge will have one hour more evening light than people on the east side.

Now consider the boundary between two time zones. The watch time for people at the west edge of the eastern zone will be one hour different than the watch time for people at the east edge of the western zone. But the sun will be at essentially the same point in the sky for both. Again, this means one person will have an extra hour in the morning, the other an extra hour in the evening.

There is no way around this, it happens the same whether the two zones are using Standard Time or Daylight Savings Time. Which means that arguments based on having more daylight in the morning or the evening may hold true for a single person at a single point, but break down when viewed from the wider perspective.

Given the above, there is no benefit to either Time setting.

It seems like the simplest solution is to simply rescind the Daylight Savings Time option.

I would suggest that a recommendation to this effect should be made to the President.

Thank you.
