
INVESTING IN AMERICA

President Biden's Bipartisan Infrastructure Law is Delivering in New Hampshire

As of May 2023

The Biden-Harris Administration has hit the ground running to implement the Bipartisan Infrastructure Law, and it is already delivering results for the people of New Hampshire. To date, \$855.2 million in Bipartisan Infrastructure Law funding has been announced and is headed to New Hampshire with over 56 specific projects identified for funding. Since the Bipartisan Infrastructure Law passed, approximately \$619.3 million has been announced for transportation – to invest in roads, bridges, public transit, ports and airports – and roughly \$172 million has been announced for clean water. And, as of today, more than 31,000 households across the state are receiving affordable high-speed internet due to the Bipartisan Infrastructure Law. Many more projects will be added in the coming months, as funding opportunities become grant awards and as formula funds become specific projects. By reaching communities all across New Hampshire – including rural communities and historically underserved populations – the law makes critical investments that will improve lives for New Hampshirites and position the state for success.

Roads and Bridges: In New Hampshire, there are 215 bridges and over 698 miles of highway in poor condition. The Bipartisan Infrastructure Law will rebuild our roads and includes the single largest dedicated bridge investment since the construction of the interstate highway system. Based on formula funding alone, New Hampshire is expected to receive approximately \$1.4 billion over five years in federal funding for highways and bridges.

- **Announced funding to date:** To date, \$533 million has been announced in New Hampshire for roads, bridges, roadway safety, and major projects. This includes:
 - \$442.2 million in highway formula funding and \$90 million in dedicated formula funding for bridges in 2022 and 2023.
 - \$19.5 million through the RAISE program in 2022 and 2023.

Announced Bipartisan Infrastructure Law funding is as of April 20, 2023

Internet: High-speed internet is necessary for Americans to do their jobs, participate in school, access health care, and stay connected. Yet nearly 15% of New Hampshire residents do not have an internet subscription. The Bipartisan Infrastructure Law invests \$65 billion to provide affordable, high-speed internet to every American. New Hampshire will receive a minimum allocation of at least \$100 million to help ensure high-speed internet coverage across the state. Additionally, experts estimate that as many as 163,000 households in New Hampshire are eligible for the Affordable Connectivity Program, which cuts internet bills by up to \$30 per month, or \$75 for households on Tribal lands, and provides a one-time \$100 discount off a connected device. The Biden-Harris Administration is providing further cost savings by working with internet providers to offer high-speed internet plans that are fully covered by the Affordable Connectivity Program — meaning most eligible households can now get high-speed internet without paying a dime.

- **Progress to date:** To date, New Hampshire has received \$5 million through the Broadband Equity, Access, and Deployment Program (BEAD) to help provide access to high-speed internet across the state. In addition, about 31,000 households in New Hampshire are enrolled in the Affordable Connectivity Program, with more signing up every day. Households can check their eligibility, sign up, and find fully covered internet plans at [GetInternet.gov](https://www.getinternet.gov).

Water: The Bipartisan Infrastructure Law represents the largest investment in clean drinking water in American history, including the first-ever dedicated federal funding to replace lead service lines and address dangerous PFAS chemicals.

- **Announced funding to date:** To date, \$173 million has been announced to New Hampshire to provide clean and safe water across the state and improve water infrastructure. This includes:
 - \$173 million available in fiscal years 2022 and 2023 to provide clean and safe water across the state through the Environmental Protection Agency. Of this funding, \$57 million is dedicated to lead pipe and service line replacement, with another \$39 million for safe drinking water investments that can also support lead pipe replacement in fiscal year 2022 and 2023.

Public Transit: The Bipartisan Infrastructure Law makes the largest investment in public transit in U.S. history. Based on formula funding alone, New Hampshire would expect to receive approximately \$126 million over five years under the Bipartisan Infrastructure Law to improve public transit across the state.¹ This funding will expand healthy, sustainable transportation options in New Hampshire, where non-white

¹ Transit formula funding amounts are subject to changes resulting from the 2020 census or from annual transit service data reported to FTA's National Transit Database.

households are 2.1 times more likely to commute via public transportation and 28% transit vehicles in the state are currently past useful life.

- **Announced funding to date:** To date, New Hampshire has been allocated \$24.3 million to improve public transportation options across the state in fiscal year 2022 and 2023.

Clean Buses: The Bipartisan Infrastructure invests over \$10 billion for clean public transit and school buses. This includes a \$5 billion investment over the next five years to replace existing school buses with zero-emission and low-emission models. Use of clean school buses promotes cleaner air, reduced health risks, especially for children, and reduced greenhouse gas emissions. This year alone, funding from the Bipartisan Infrastructure Law will help double the number of clean public transit buses on America's roads.

- **Announced funding to date:** To date, schools in New Hampshire have been awarded \$2.8 million through the Environmental Protection Agency's Clean School Bus Program.

Electric Vehicle Charging: The Bipartisan Infrastructure Law invests \$7.5 billion to build the first-ever national network of electric vehicle chargers in the United States and is a critical element of President Biden's plan to address the climate crisis and support domestic manufacturing jobs. Through the National Electric Vehicle Infrastructure Program alone, New Hampshire should expect to receive roughly \$17 million in formula funding over five years to support the expansion of electric vehicle charging in the state.

- **Announced funding to date:** New Hampshire has been allocated \$6.2 million in 2022 and 2023 to build out a network of EV chargers across the state.

Clean Energy & Power: Power outages cost the U.S. economy more than \$70 billion annually. The Bipartisan Infrastructure Law makes a historic investment to upgrade our power infrastructure by making the grid more resilient and building thousands of miles of new transmission lines to deliver clean, affordable electricity. The law also makes a historic investment in clean energy technologies like advanced nuclear, clean hydrogen, carbon capture, and batteries, as well as a historic \$3.5 billion investment in weatherization to improve energy efficiency of homes and lower energy costs for impacted households by an average of \$372 per year.

- **Announced funding to date:** To date, approximately \$31.9 million has been allocated to New Hampshire for clean energy, energy efficiency, and power in 2022 and 2023. This includes:
 - \$18.2 million for weatherization;

- \$3.6 million through the State Energy Program;
- \$3.5 million through the Energy Efficiency and Conservation Block Grant Program;
- \$6.6 million to prevent outages and make the power grid more resilient. Additional grid funding will be made available in the coming months.

Airports: According to some rankings, no U.S. airports rank in the top 25 of airports worldwide. The Bipartisan Infrastructure Law invests \$25 billion in airports to replace and modernize airport infrastructure, which helps the U.S. become more economically competitive globally, creates good jobs, and revitalizes and supports more efficient and enhanced traveler experience.

- **Announced funding to date:** To date, New Hampshire has received approximately \$31.9 million in 2022 and 2023 for airports.

Ports and Waterways: Like airports, our ports and waterways are in need of repair and investment. The Bipartisan Infrastructure Law invests \$17 billion in port infrastructure to strengthen our supply chains, address maintenance backlogs, and reduce congestion and emissions near ports— ultimately helping our country move goods more quickly and at lower cost.

- **Announced funding to date:** To date, New Hampshire has received roughly \$1.8 million in 2022 and 2023 for ports and waterways.

Resilience: Millions of Americans feel the effects of climate change and extreme weather every day. More frequent hurricanes, wildfires, heat waves, floods, unprecedented power outages, and persistent droughts devastate our communities and threaten our infrastructure. In the last decade, New Hampshire has experienced 4 extreme weather events, costing the state up to \$250 million in damages. The Bipartisan Infrastructure Law makes a historic investment to bolster our resilience against pressing challenges like impacts of climate change, extreme weather events, and other hazards like cyberattacks.

- **Announced funding to date:** To date, approximately \$17.7 million has been allocated to New Hampshire for infrastructure resilience in 2022 and 2023 including \$2.4 million through the Army Corps of Engineers for flood mitigation.

Legacy Pollution Cleanup: Across the country, thousands of former industrial, chemical, and energy sites emit harmful pollutants into surrounding communities. These sites pose harms to health, welfare, and economic prosperity — and disproportionately impact communities of color: 26% of Black Americans and 29% of Hispanic Americans

live within 3 miles of a Superfund site, a higher percentage than for Americans overall. The Bipartisan Infrastructure Law will deliver the largest investment in tackling legacy pollution in American history by cleaning up Superfund and brownfield sites, reclaiming abandoned mines, and capping orphaned oil and gas wells.

- **Announced funding to date:** To date, approximately \$3.5 million has been allocated to cleaning up brownfield sites.

New Hampshire Project Spotlights

RAISE Grant Program Project Spotlight

Renewing Berlin with Renewable Energy Project

The Department of Transportation awarded \$19.5 million in RAISE Grants to the rehabilitation of roads, sidewalks and municipal parking areas, coupled with the installation of a snow-melt system in Downtown Berlin. It includes an improved pedestrian crosswalk with bump-out curbs, high-visibility crosswalk markings, ADA compliant sidewalks, and new street trees. The project will improve access to the Downtown area for residents and visitors during winter. The improved streetscape without snow and ice during winter will reduce vehicle crashes, pedestrian slips and falls, and improve access for residents and visitors to services in Downtown Berlin. The project will make travel more reliable, while also significantly reducing maintenance costs and the negative environmental effects resulting from the current processes for maintenance and snow removal.

See [here](#) for more information on awarded grants through the RAISE program.

Low Emission Bus Project Spotlight

Bus and Bus Facilities

The Department of Transportation's Federal Transit Administration has awarded over \$7.7 million to the Cooperative Alliance for Seacoast Transportation to build a new facility for its administration, operations and maintenance activities. The new facility will include energy-efficient features such as solar panels, help sustain transit operations, allow all staff to work under one roof and reduce operating expenses.

See [here](#) for more information on the FTA Bus and Low- and No-Emission Grant Program.

Ports Project Spotlight

Portsmouth Harbor

The U.S. Army Corps of Engineers awarded \$1.6 million to the Portsmouth Harbor for dredging and surveys.

See [here](#) for a list of announced U.S. Army Corps projects.

Airport Project Spotlight

Manchester-Boston Regional Airport

The Federal Aviation Administration awarded a \$4.1 million grant to the Manchester-Boston Regional airport for a project replacing the existing Lincoln terminal cooling towers, fans, internal exhaust decks, control equipment and associated plumbing. This project's overall aim is to resolve passenger and baggage screening area constraints and to rebuild the airline areas to allow for more flexible and competitive commercial air service opportunities.

See [here](#) for a map and list of the Airport Terminal awards.

Resilience Project Spotlight

Hopkinton-Everett Lakes

The U.S. Army Corps of Engineers awarded \$1.4 million to repave roadways and invest in the engineering and design of dam repair at Hopkinton-Everett Lakes.

See [here](#) for a list of announced U.S. Army Corps projects.
