FISCAL YEAR 2024

OFFICE OF MANAGEMENT AND BUDGET

THE WHITE HOUSE
WASHINGTON

MID-SESSION REVIEW

**BUDGET OF THE
U.S. GOVERNMENT**

FISCAL YEAR 2024

OFFICE OF MANAGEMENT AND BUDGET

THE WHITE HOUSE
WASHINGTON

THE DIRECTOR

EXECUTIVE OFFICE OF THE PRESIDENT
OFFICE OF MANAGEMENT AND BUDGET
WASHINGTON, D.C. 20503

July 28, 2023

The Honorable Kevin McCarthy
Speaker of the House of Representatives
Washington, DC 20515

Dear Mr. Speaker:

Section 1106 of Title 31, United States Code, requires the President to send to the Congress a supplemental update of the Budget that was transmitted to the Congress earlier in the year. The supplemental update of the Budget, commonly known as the Mid-Session Review, is enclosed.

Sincerely,

A handwritten signature in black ink that reads "Shalanda D. Young". The signature is written in a cursive style.

Shalanda D. Young

Enclosure

Identical letter sent to the Honorable Kamala D. Harris

INTRODUCTION

In his State of the Union address this year, the President laid out his vision to make the economy work for everyone. Decades of failed trickle-down economics meant the wealthy got massive tax cuts while the majority of Americans were left behind, factories were shut down, good jobs were shipped overseas, and communities were hollowed out. Since his first day in office, the President began working to rebuild the economy from the depths of the pandemic—not to return us to the pre-pandemic status quo, but to grow the economy from the middle out and the bottom up. His vision means building more things in America, empowering and investing in American workers, and promoting competition to lower costs for families.

The President's historic legislative accomplishments are putting working- and middle-class families at the center of our economy. His Investing in America agenda has catalyzed over \$500 billion in private sector manufacturing investment commitments. The President's Bipartisan Infrastructure Law has helped start 37,000 projects to rebuild our Nation's outdated infrastructure. And the Inflation Reduction Act is giving families more breathing room by lowering prescription drug costs and creating clean energy jobs as we fight against climate change.

Alongside these investments, the President has demonstrated a proven track record of fiscal responsibility. The annual deficit has fallen by more than \$1 trillion since he took office, and he has signed into law legislation that will reduce the deficit by approximately another \$1 trillion over the next 10 years. The President's Budget proposes mandatory investments and tax reforms that would reduce the deficit by an additional \$2.6 trillion, including debt service, by cutting wasteful spending on special interests and making the wealthy and large corporations pay their fair share. It does this while making investments that strengthen our economy's potential, building on the efforts of the past two and a half years.

More than two years into the Administration, there is clear and compelling evidence that the President's economic vision works. Under the President's leadership, the economy has added more than 13 million new jobs, including almost 800,000 manufacturing jobs. The unemployment rate has remained under 4% for the longest period in more than 50 years, with the unemployment rates for women, African-Americans, Hispanic Americans, and people with disabilities having achieved historic lows. The President is working to bring down the cost of living and inflation has come down 11 months in a row. Inflation-adjusted income is now up 3.5 percent since the President took office, with low-wage workers seeing the largest gains over the last year. More than 10 million applications for new small businesses were filed in 2021 and 2022—the strongest two years on record.

While the job is far from done, Americans are better off now thanks to the President's economic agenda. The Administration will continue to deliver on the President's vision for an economy that works for Americans.

MID-SESSION UPDATE

The Mid-Session Review (MSR) updates the Administration's estimates for receipts, outlays, and the deficit for changes that have occurred since the President's 2024 Budget (Budget) was completed in March. Legislative changes include the enactment of the Fiscal Responsibility Act of 2023 (FRA) – including caps on discretionary funding, rescissions of unobligated funding previously provided for COVID relief, changes to the Supplemental Nutrition Assistance Program (SNAP) and Temporary Assistance for Needy Families (TANF), and reduced receipts due to a rescission of tax enforcement resources. The MSR also includes reestimates for revised economic assumptions and technical factors.

The deficit for 2023 under the President's policies is now projected to be \$1,543 billion, \$26 billion lower than the \$1,569 billion deficit projected in March. As a share of gross domes-

tic product (GDP), the 2023 deficit is projected to be 5.8 percent, down from 6.0 percent in March. The 2023 deficit estimate in the MSR is \$167 billion above the deficit reported for 2022—rising 0.3 percentage points as a share of GDP.

Going forward, the MSR estimates that deficits will be largely unchanged over the next decade, \$107 billion (0.6 percent) higher over the 10-year budget horizon relative to the Budget. Factors contributing to this increase include an estimated net increase in Premium Tax Credit and Cost-Sharing Reduction outlays due to higher enrollment, and an estimated net increase in outlays for clean energy tax credits. These factors are partially offset by decreased estimates in

outlays, particularly in Social Security and Medicare.

Relative to the MSR baseline—which includes updates for enacted legislation, economic revisions, and technical reestimates—the MSR estimates the President’s mandatory and tax policies reflected in the 2024 Budget would cut \$2.6 trillion from deficits over the 10-year window. Consistent with standard practice, the MSR has not updated the discretionary funding levels that the President proposed in his Budget to account for the FRA. Doing so would result in additional savings relative to the deficit levels shown in the MSR and relative to the FRA savings shown in Tables 1 and 5, which do not reflect the FRA’s discretionary caps.

*-\$500 million or less.

¹ Includes outlay and receipt effects. Does not include savings from discretionary caps. Consistent with standard practice, the MSR has not updated the discretionary funding levels that the President proposed in his Budget to account for the FRA. Doing so would result in additional savings relative to the deficit levels shown in the MSR and relative to the FRA savings shown above.

² Includes debt service on all reestimates.

ECONOMIC ASSUMPTIONS

ECONOMIC PROJECTIONS

The Administration’s MSR forecast is based on information available as of June 1, and, like the Budget’s economic assumptions, assumes that the President’s proposals will be enacted. As economic conditions have continued to evolve since June 1, we anticipate that a forecast assembled today would differ in various ways from the MSR forecast—just as some private forecasts for unemployment and growth have improved in recent months. The projections for a set of key variables can be found in Table 2.

Real Gross Domestic Product (GDP): Real GDP growth is expected to be 0.4 percent (fourth-quarter-over-fourth-quarter) in 2023 and 1.8 percent in 2024. Growth rates are expected to increase during the medium-term of the forecast as GDP growth is projected to average 2.0 percent between 2026-2028, rising to 2.2 percent by the end of the Budget window (2030-2033), in part reflecting the positive effects of the President’s policies.

Inflation: The MSR projection for consumer price index (CPI) inflation in 2023 is 3.3 percent on a fourth-quarter-over-fourth-quarter basis. CPI inflation is then projected to fall to 2.5 percent in 2024, before reaching a long-run rate of 2.3 percent over the remainder of the Budget window.¹

Unemployment: The unemployment rate is expected to average 3.8 percent during 2023, 4.4 percent in 2024, and then decline over the rest of the budget window to an annual average of 3.8 percent by the end of the forecast horizon. These projections represent mild downward revisions to the unemployment rate during the near-term of the forecast relative to those underlying the 2024

Budget, and are unchanged from the Budget during 2028-2033.

Interest Rates: The MSR projections for 91-day Treasury Bills have been revised slightly upwards in the near-term relative to the Budget, forecasting an annual average of 5.0 and 4.1 percent in 2022 and 2023, respectively. The 10-year Treasury rate, however, remains broadly similar to the Budget forecast over the forecast horizon.

FORECAST COMPARISONS

The Administration’s MSR forecast, which was finalized on June 1, differs from comparable forecasts in part because of different timing across forecasts. For example, the most recent Congressional Budget Office (CBO) forecast was produced approximately 6 months before the MSR forecast and thus differs from the MSR in several places due to differences in available information. Additional differences arise due to the Administration’s assumption that the President’s policy proposals will be enacted, including expanding access to affordable, high-quality early child care and learning, improving college affordability, and modernizing our immigration system. Outside forecasters may also differ on their assessments of enacted legislation making historic improvements in infrastructure and U.S. manufacturing. Table 3 below shows economic forecast comparisons.

Real Gross Domestic Product: The Administration’s MSR forecast for short-run (fourth-quarter-over-fourth-quarter) real GDP growth in 2023 remains at 0.4 percent. This forecast is slightly above the May Blue Chip consensus and CBO forecasts, and is the same as the Federal Open Market Committee (FOMC) median forecast. For 2033, the MSR forecasts 2.2 percent growth, compared with the Blue Chip consensus forecast of 1.8 percent, the CBO forecast of 1.7 percent, and the FOMC median forecast of 1.8 percent.

¹ Note that the Federal Reserve targets 2.0 percent inflation in the price index for personal consumption expenditures (PCE), not the CPI. Over the long run, PCE inflation tends to be about 0.25 to 0.30 percentage point less than CPI inflation, so the Administration’s forecast is consistent with the Federal Reserve’s target.

Interest Rates, Percent:												
91-Day Treasury Bills ⁵	2.0	5.0	4.1	3.2	2.7	2.4	2.3	2.3	2.3	2.4	2.5	2.5
10-Year Treasury Notes	3.0	3.7	3.7	3.5	3.4	3.3	3.3	3.4	3.4	3.4	3.4	3.4

¹ Based on information available as of June 1, 2023.

² Seasonally Adjusted.

³ Overall average increase, including locality pay adjustments; percentages to be proposed for years after 2024 have yet to be determined.

⁴ Percentages apply to basic pay only; value for 2023 is actual; percentages to be proposed for years after 2024 have yet to be determined.

⁵ Average rate, secondary market (bank discount basis).

Unemployment: The Administration's forecast for the unemployment rate during 2023 is 3.8 percent (annual average) – the same as the Blue Chip consensus and lower than the FOMC and CBO forecasts.² The Administration's forecast is broadly similar to the Blue Chip and the FOMC median forecasts over the medium-run, while modestly lower than the CBO's over that timeframe.

² Note that the FOMC forecasts the level of the unemployment rate in the fourth quarter, not the annual average.

Over the long-run, the Administration's forecast is mildly lower than all three comparative forecasts.

Inflation: The Administration's MSR forecast for CPI inflation in 2023 (fourth-quarter-over-fourth-quarter) is 0.1 percentage points higher than the May Blue Chip consensus and modestly lower than the CBO's, which was finalized in late 2022. The MSR CPI inflation forecast for 2023 is slightly below the CPI-equivalent of the FOMC's personal consumption expenditures (PCE) forecast. Similar to

CBO, the MSR forecast for CPI inflation settles into a long-run level of 2.3 percent over the medium-term and remains there over the Budget window. The Blue Chip consensus forecasts a 2.1 percent CPI inflation rate during the long-run. These forecasts are all consistent with the view that long-run inflation will continue to be

anchored by the Federal Reserve's stated policy target of 2.0 percent PCE inflation.

Interest Rates: On interest rates, the Administration's MSR forecast for 91-day Treasury bill rates is broadly similar to the Blue Chip consensus and CBO forecasts over the budget window, with differences arising

MSR = 2024 Mid-Session Review (forecast date: June 2023)

Budget = 2024 Budget (forecast date: November 2022)

CBO = February 2023 Congressional Budget Office economic projections (forecast date: December 2022)

Blue Chip = May 2023 Blue Chip Consensus forecast (2023-2024) extended with March 2023 Blue Chip Consensus (2025-2033)

¹ PCE Inflation.

² Fourth quarter level of unemployment.

more in the near term than in the outyears. The CBO forecast for 91-day rates is slightly lower than the MSR forecast over the budget window. The MSR forecast for 10-year Treasury notes is similar to Blue Chip and CBO during the near-term. Mild differences arise during the out-years of the forecast where the MSR forecast for 10-year rates is mildly lower than the CBO forecast and above the Blue Chip consensus forecast.

Related to the path of interest rates is the trajectory of debt held by the public, as well as real net interest, which measures the real (inflation-adjusted) cost of debt. Real net interest has averaged one percent of GDP since 1980 and averaged two percent of GDP in the 1990s. Table S-1 shows that real net interest is projected to remain at or below 1.1 percent of GDP throughout the decade. Table 3 below shows economic forecast comparisons.

RECEIPTS

The Mid-Session Review (MSR) estimates of receipts are below the 2024 Budget estimates by \$215 billion in 2023 and by \$9 billion in 2024 (see Table 4 below). The MSR estimates of receipts are below the Budget estimates through 2028 and above the Budget in 2029 through 2033, for a net increase in receipts of \$88 billion over the 10-year budget horizon (2024 through 2033).

Most of the net decrease in 2023 receipts is attributable to technical revisions based on new tax reporting data, collections to date, and other information, which decrease receipts by \$191 billion. A reduction in net savings from the Administration's proposals reduces receipts by \$28 billion. Revised economic assumptions increase 2022 receipts by \$4 billion.

The estimate of 2024 receipts is below the Budget estimate due to a \$47 billion decrease in receipts attributable to technical revisions, offset by an increase in net savings from the Administration's proposals of \$35 billion and an increase of \$4 billion due to revised economic assumptions.

The \$88 billion increase in receipts over the 10-year budget horizon is the result of a \$264 billion increase in receipts due to technical revisions, offset by a \$282 billion decrease attributable to revisions in the economic forecast. An increase in the net savings from the Administration's proposals increases receipts by an additional \$107 billion.

ECONOMIC CHANGES

Revisions in the economic forecast increase receipts by \$4 billion in 2023 and in 2024, and decrease receipts in each subsequent year, for a total decrease of \$282 billion over the 10 years from 2024 through 2033.

In 2023, revisions to the economic forecast have the greatest effect on corporation income taxes, increasing receipts by \$8 billion. This increase is primarily attributable to increases

in the forecast of GDP, resulting in an increase in taxable corporate income relative to the Budget forecast.

Over the 10-year budget window, revisions in the economic forecast have the greatest effect on corporation income taxes, increasing collections by \$321 billion, attributable to revisions in the forecast of wages and salaries, as lower wages mean higher corporate profits. The decrease in the forecast of wages and salaries also accounts for most of the \$317 billion decrease in social insurance and retirement receipts, primarily Social Security and Medicare payroll taxes, and the \$210 billion decrease in individual income taxes. Increases in the forecast of interest rates drives a decrease of \$31 billion in deposits of earnings by the Federal Reserve System, as banks earn higher interest on their excess reserves leaving less profit to remit to the Treasury. Revisions in the forecasts of GDP, interest rates, imports, and other sources of income decrease all remaining sources of receipts by a net \$45 billion.

TECHNICAL CHANGES

Technical revisions in the estimates of receipts decrease receipts by \$191 billion in 2023 and by \$47 billion in 2024. Technical revisions result in a net increase in receipts of \$264 billion over the 10-year budget window. The downward technical revisions in 2023 are primarily due to individual income tax collections data for tax year 2022 and 2023, which decreases receipts by \$143 billion. Technical revisions decreased other sources of receipts by a net \$48 billion.

Over the 10-year budget window, technical revisions increase collections of individual income taxes by \$395 billion, reflecting actual tax return data and model updates. Technical revisions decrease collections of corporation income taxes by \$119 billion, which reflects actual data and modeling updates. Technical revisions in all other sources of receipts decrease receipts by \$11 billion.

ENACTED LEGISLATION AND REVISIONS IN PROPOSALS

One law enacted since the Budget had small effects on total receipts. The Fiscal Responsibility Act of 2023 reduced receipts by \$2 billion, due to a rescission of \$1.4 billion in tax enforcement resources provided to the Internal Revenue Service in the Inflation Reduction Act.

Changes in the estimates of receipt proposals increased receipts by \$107 billion over the 10-year window. Proposals to apply the net investment income tax to pass-through business income of high-income taxpayers, reform the taxation of capital income, and impose a minimum income tax on the wealthiest taxpayers were the primary drivers of the change in receipt proposals.

* \$500 million or less.

EXPENDITURES

Outlays for 2023 in the Mid-Session Review (MSR) are estimated to be \$6,130 billion, \$242 billion below the 2024 Budget estimate. After 2023, outlays are higher relative to the 2024 Budget in each year through 2031 and lower in 2032 and 2033, for a net increase of \$195 billion over the 10-year budget horizon. The increase over the budget window is largely due to estimating changes for mandatory programs and net interest from revised economic assumptions and technical factors. Changes due to enacted legislation increase outlays by smaller amounts.

ENACTED LEGISLATION CHANGES

Legislation enacted since the Budget was completed decreases outlay estimates by \$7 billion in 2023 and decreased outlay estimates by \$4 billion over the 10-year budget window. The FRA decreased discretionary spending by \$4 billion in 2023, and by an additional \$3 billion from 2024 to 2033. The FRA decreased mandatory spending by \$3 billion in 2023, and by \$1 billion from 2024 to 2033, due to rescissions of unobligated funding previously provided for COVID relief and changes to the Supplemental Nutrition Assistance Program (SNAP).

ESTIMATING CHANGES

Estimating changes are due to factors other than enacted legislation and may include revisions to economic assumptions, discussed earlier in this MSR, and updates to technical factors. Relative to Budget estimates, economic and technical changes decrease estimated outlays by \$235 billion for 2023 and increase estimated outlays by \$203 billion over the 10-year window.

Discretionary Programs. Relative to the Budget, outlays for discretionary programs are \$8 billion lower in 2023 and \$17 billion higher over the 10-year window. The changes in 2023 reflect a \$2 billion decrease in defense spending and a \$7 billion decrease in non-defense spending. Outlays over the 2024-2033 period decreased by \$4 billion for defense pro-

grams and increased by \$20 billion for non-defense programs.

Social Security. Estimating changes decrease outlays for Social Security by \$1 billion in 2023 and by \$276 billion over the 10-year window. The decrease in outlays for 2024 through 2033 is due to lower projected beneficiary counts and applicant volume. Net outlays are also lower through the budget window due to the revised forecast for earnings and the consumer price index, which results in lower average wage increases and Cost of Living Adjustments (COLAs) than assumed in the Budget.

Refundable Premium Tax Credit (PTC) and Cost Sharing Reductions. Outlays for refundable premium tax credits and cost sharing reductions are \$198 billion above the Budget projections for 2024 to 2033. The increase is largely the result of technical revisions stemming from increased actual enrollment in Health Insurance Exchanges.

Clean energy tax credits. Compared to the Budget estimates, outlays for clean energy tax credits are \$4 billion lower in 2023 due to a change in assumed payment dates. Outlays for 2024 to 2033 are projected to increase by \$120 billion.

Medicare. Estimating changes increase outlays for Medicare by \$6 billion in 2023 and decrease outlays by \$100 billion from 2024 to 2033, relative to the Budget. The slight increase in 2023 is primarily due to technical factors affecting Medicare Part B, including updated historical data and increased spending on COVID-19 over-the-counter tests. Changes to projected enrollment, updated historical data, and higher expenditures for outpatient hospitals increase Part B spending slightly across the Budget window. Economic factors increase Part A and Part B outlays marginally across the Budget window and include adjustments for average hourly compensation, forecasted inflation, and productivity rates. Part A outlays decrease over the 10-year window due to technical updates to year-to-date actuals,

lower Medicare Advantage (MA), and lower inpatient hospital spending. These decreases are partially offset by increased MA enrollment and economic factors that are expected to increase benefit expenditures.

Medicaid. Estimating changes increase Medicaid outlays by \$15 billion in 2023 relative to the Budget estimates and by \$100 billion from 2024 to 2033. The increase in 2023 and 2024 outlays is attributable to updated projections of Medicaid enrollment as a result of the end of the COVID-19 continuous enrollment requirement. Medicaid spending changes over the remainder of the budget window are primarily due to recent administrative actions. Most notably, the Medicaid and Children's Health Insurance Program (CHIP) Managed Care Access, Finance, and Quality Proposed Rule (88 Fed. Reg. 28092 (May 3, 2023)) is expected to drive increased spending due to proposed changes to managed care payment and access policy. These increases are slightly offset by economic changes due to revised inflation assumptions and the costs of medical services.

Student loans and financial assistance. Relative to the Budget, outlays for student loans decreased by \$259 billion in 2023 due to the Supreme Court ruling on student loan forgiveness, which was partially offset by the release of a new rule on income driven repayment plans. That same rule increases costs from 2024 to 2033 by \$85 billion, while changes due to economic assumptions decrease outlays by \$32 billion given forecasts of lower future loan volume tied to lower unemployment rate projections.

Unemployment Compensation. Outlays for unemployment compensation are \$4 billion below Budget projections for 2023 and \$47 billion lower over the 10-year window. The decreases are partially attributable to the FRA, which enacted a rescission of \$80 million in unobligated CARES Act funds and \$1 billion in unobligated American Rescue Plan Act funds. Other significant reductions in outlays are due to a lower unemployment rate forecast. Lower estimated wage growth over the 10-year window leads to lower benefit amounts. These reductions were slightly offset by updates for year-to-date actual spending data and higher program activity.

Federal Deposit Insurance Corporation (FDIC). Outlays for FDIC's Deposit Insurance Fund and Orderly Liquidation Fund are \$28 billion higher in 2023 and \$33 billion lower over the 10-year window. The significant increase in net outlays in 2023 reflects loss expectations from realized bank failures in 2023, including increased net payment on losses and disbursement on resolutions. Lower net outlays over the 10-year window primarily reflect technical updates that incorporate ongoing loss and recovery assumptions, as well as adjustments to bank assessment rates to incorporate FDIC's proposed special assessment on banks and to account for the bank failures in 2023 in order to achieve the long-run reserve ratio target. Economic assumptions account for a small portion of the net outlay change and are primarily driven by updated interest rates and GDP assumptions.

Child Nutrition Programs. Compared with the Budget projections, outlays for child nutrition programs increased by \$27 billion from 2024 to 2033. The change was largely driven by higher food costs due to an increase in the CPI and higher-than-anticipated Summer Electronic Benefit Transfer benefit level.

Supplemental Nutrition Assistance Program (SNAP). Outlays for SNAP are \$23 billion lower from 2024 through 2033, relative to the Budget. The decrease is primarily due to revised economic assumptions including a lower estimated increase in the price of the Thrifty Food Plan, which reduces overall SNAP costs over the 10-year window. Revised participation assumptions increase costs modestly.

Child Tax Credit (CTC). Compared with the Budget forecasts, CTC outlays are \$2 billion lower in 2023 and \$18 billion lower for 2024 to 2033. The decrease in outlays is attributable to lower expected average credit payments despite increasing the number of families in the eligible range. Technical revisions for actuals to date also reduce estimated outlays.

Postal Service. Outlays for the Postal Service increased by \$4 billion in 2023 and by \$15 billion from 2024 to 2033. The increase is mostly attributable to technical revisions in the Postal Service's revenue forecast, which incorporates lower-than-expected collections for 2023, and higher estimated costs for expenses throughout

the 10-year window. Starting in 2027, higher collections partially offset the increase in expenses.

Other programs. Relative to the Budget, outlays for other mandatory programs are \$1 billion lower in 2023 and \$44 billion higher for 2024 to 2033 due to economic revisions and technical reestimates. Projected outlays for 2023 changed by relatively large amounts for several programs and activities that supported the Administration's investment in veterans, families, and domestic manufacturing. Those programs include: Pension Benefit Guaranty Corporation; veterans education, training, and rehabilitation; State and Tribal

assistance grants; income security for veterans; Supplemental Security Income (SSI); Federal employee retirement (employer share contributions); and other income security.

Net Interest. Excluding the debt service associated with enacted legislation, outlays for net interest are projected to decrease by \$8 billion in 2023 and increase by \$93 billion over the 10-year window. The majority of the net increase is the result of revised economic assumptions, including projections for Treasury interest rates and higher growth in the CPI. Technical revisions are largely due to updating for the impacts of year-to-date actuals.

*\$500 million or less.

¹ Does not include savings from discretionary caps. Consistent with standard practice, the MSR has not updated the discretionary funding levels that the President proposed in his Budget to account for the FRA. Doing so would result in additional savings relative to the deficit levels shown in the MSR and relative to the FRA savings shown above.

² Includes debt service on all reestimates.

												2024-2028	2024-2033	
Reauthorize and reform the Community Development Financial Institutions (CDFI) Fund Bond Guarantee Program														
Increase access to the Capital Magnet Fund														
Subtotal, Department of the Treasury										-45,172	-54,934		-100,106	
Department of Veterans Affairs:														
Enhance burial benefits for veterans:														
Authorize the Department of Veterans Affairs (VA) to pay a flat rate for the cost of domestic transportation of a deceased veteran to a national cemetery or covered veterans' cemetery														
Authorize designation of eligibility for a flag														
Expand eligibility for government-furnished headstone, marker, or medallion for medal of honor recipients														
Pay accrued benefits to reimburse the person(s) who bore the expense on a first-to-file basis														
Provide permanent authority for burial of spouses and dependent children who predecease active duty servicemembers														
Standardize and enhance VA compensation and pension benefit programs:														
Remove matches performed to prevent duplication of benefits in accordance with the prohibitions specified in 38 U.S.C. 5304 from the Privacy Act definition of "matching agreement"		-75	-81	-87	-94	-100	-107	-113	-120	-127	-134	-437	-1,038	
Amend 38 U.S.C. to preempt the applicability of state laws to VA-appointed fiduciaries														
Codify the correct rate of medal of honor special pension														
Eliminate entitlement to additional pension for veterans who are permanently and totally disabled ...														
Eliminate sunset date on the licensure requirements (portability) for contractor medical professionals to perform medical disability examinations and expansion of the definition of a health care professional														

SUMMARY TABLES

Table S-5. MANDATORY AND RECEIPT PROPOSALS—Continued

(Deficit increases (+) or decreases (-) in millions of dollars)

	2023	2024	2025	2026	2027	2028	2029	2030	2031	2032	2033	Totals		
												2024-2028	2024-2033	
Eliminate the direct payment of fees from VA to accredited agents and attorneys														
Extend the statutory marriage delimiting date for surviving spouses of Gulf War veterans														
Modernize VA's processing of survivors' benefits claims														
Provide paid representation for non-continuously pursued supplemental claims under the Appeals Modernization Act														
Standardize and enhance VA education and employment benefit programs:														
Create one GI Bill		22	6	6	6	266	251	492	431	349	285	306	2,114	
Create entitlement charge parity between degree programs and non-degree programs		-1	-1	-1	-1	-1	-1	-1	-1	-1	-1	-5	-10	
Permit full allocation of State Approving Agency funding including the cost of living adjustment (COLA) at the beginning of the fiscal year		1	1	1	1	1	1	1	1	1	1	5	10	
Prevent VA from providing unlimited amounts of payment for flight training at public schools		-13	-13	-14	-14	-15	-15	-16	-16	-17	-17	-69	-150	
Allow VA to contract with another State Approving Agency to fulfill duties														
Allow reallocation of State Approving Agency funds														
Authorize VA to approve interstate commerce carrier apprenticeship programs														
Bar approval and disapproval of new enrollments in programs of education at accredited schools which are financially unstable														
Eliminate change of program requirement														
Forfeit GI Bill benefits if a veteran or beneficiary colludes in fraud														
Improve VA's "85/15 rule" to better align with the Department of Education's "90/10 rule"														
Improve safeguards against the use of erroneous, deceptive, or misleading advertising or the use of commissions, bonus, or other incentive payments														
Improve repayment of VA benefits payments for misused benefits

² Estimates were not available at the time of Budget publication.

³ The Cancer Moonshot authorization expires in 2023. The Budget prioritizes the reauthorization of the Cancer Moonshot by requesting \$716 million in discretionary resources within NIH in 2024 in discretionary resources and by proposing a mandatory reauthorization through 2026. The total Budget request for NIH Cancer Moonshot is \$3.6 billion through 2026.

⁴ The Budget proposes to support the USPS through an intragovernmental transaction that increases the balances in the Postal Service Fund but results in no net deficit effect in the 10-year budget window. The General Fund appropriation of \$465 million in 2024 can be found in the transmit 4 for the Payment to the Postal Service account and is offset in the receiving account, the Postal Service Fund.

⁵ Net of income offsets.

⁶ Effects are included in the estimate of Repeal the enhanced oil recovery credit.

⁷ The estimate for this proposal includes effects on outlays. The outlay effects included in the totals above are as follows:

* \$500 million or less.

¹ A decrease in the Treasury operating cash balance (which is an asset) is a means of financing a deficit and therefore has a negative sign. An increase in checks outstanding (which is a liability) is also a means of financing a deficit and therefore also has a negative sign.

² Includes checks outstanding, accrued interest payable on Treasury debt, uninvested deposit fund balances, allocations of special drawing rights, and other liability accounts; and, as an offset, cash and monetary assets (other than the Treasury operating cash balance), other asset accounts, and profit on sale of gold.

³ Consists mainly of debt issued by the Federal Financing Bank (which is not subject to limit), the unamortized discount (less premium) on public issues of Treasury notes and bonds (other than zero-coupon bonds), and the unrealized discount on Government account series securities.

⁴ Legislation enacted June 3, 2023 (P.L. 118-5), temporarily suspends the debt limit through January 1, 2025.

⁵ Treasury securities held by the public and zero-coupon bonds held by Government accounts are almost all measured at sales price plus amortized discount or less amortized premium. Agency debt securities are almost all measured at face value. Treasury securities in the Government account series are otherwise measured at face value less unrealized discount (if any).

⁶ At the end of 2022, the Federal Reserve Banks held \$5,634.9 billion of Federal securities and the rest of the public held \$18,617.4 billion. Debt held by the Federal Reserve Banks is not estimated for future years.

⁷ Treasury's warrants to purchase 79.9 percent of the common stock of the enterprises expire after September 7, 2028. The warrants were valued at \$4 billion at the end of 2022.

⁸ Portions of the notes and warrants issued under the Air carrier worker support program (Payroll support program) are scheduled to expire in 2025, 2026, 2030, and 2031.
