

**OMB Report to Congress on United States Contributions to the
United Nations and Affiliated International Organizations
for Fiscal Year 2022**

The following report on U.S. Contributions to the United Nations (UN) is prepared pursuant to section 312 of the Department of State Authorities Act, Fiscal Year 2017 (Public Law 114-323, "FY 2017 Authorities Act") and Section 4(b) of the United Nations Participation Act (22 U.S.C. § 287b(b)).

Section 312 requires the Director of the Office of Management and Budget (OMB) to submit to the Congress a report on all assessed and voluntary contributions with a value greater than \$100,000, including in-kind, of the U.S. government to the United Nations and its affiliated agencies and related bodies during the previous fiscal year.

Section 4(b) of the United Nations Participation Act further requires the Secretary of State to submit an annual report to Congress on the extent and disposition of all financial contributions (any amount) made by the United States during the preceding year to international organizations (including the UN and its affiliated agencies) in which the United States participates as a member.

Due to the significant overlap in these two reporting requirements, this report for fiscal year 2022 addresses both by covering contributions of any amount to international organizations and multilateral entities (including the UN and its affiliated agencies) for fiscal year 2022. The report includes funding in support of certain multilateral entities that are not generally considered international organizations.

For each entry, the report provides specific information including: the responsible U.S. government agency and bureau, the account that was the source of the funding, the recipient entity, a description of the purpose of the activity that the funding supported, the amount obligated, and whether the Department considers the amount provided to be an assessed contribution.

Note, the grand total of contributions under Section 312 does not match that of contributions tabulated for Section 4(b) since the former is limited to

contributions to UN and affiliated agencies and the latter covers the entirety of contributions to all international organizations. The report includes funding in support of certain multilateral entities that are not generally considered international organizations. The format of this report is similar to previous OMB reports on contributions.

The Department of State collaborated with OMB on the production of the report and has also submitted it to Congress and will post it on its website at <https://www.state.gov/u-s-contributions-to-international-organizations>, consistent with the United Nations Participation Act. Some of the information included in the report was provided to OMB by the Executive Branch agencies identified in the report. Each participating agency was responsible for the completeness and accuracy of the information provided. Not all Executive Branch agencies provided information for inclusion in the report.

The amounts of U.S. government funding included in this report are amounts of funding obligated in fiscal year 2022. The amounts of total funding to recipient entities from all sources in the report is generally by calendar year, except for funding for UN peacekeeping missions, which have a July 1 through June 30 financial year. The amounts of total funding were obtained from publicly available documents produced by the recipient entities. Information for recipient entities was not available when the Department and OMB initially produced this report.

The information provided on U.S. government funding includes financial and in-kind support, including assessed contributions, voluntary contributions, grants, and other financial assistance to international organizations and multilateral entities. In some instances, the amounts presented are negative. These negative amounts reflect de-obligations of funds previously obligated, including in prior fiscal years. This report includes all obligations and de-obligations made in fiscal year 2022.

This report does not contain information on contracts for goods or services provided to the U.S. government, the cost to the U.S. government of the salaries and expenses of American employees detailed to the secretariats of international organizations, or the costs of reimbursing international

organizations for taxes that American citizens and legal permanent residents employed by the organizations pay to U.S. federal, state, and local governments. Contributions to international financial institutions such as the International Bank for Reconstruction and Development are not included in this report but are the subject of a separate report to the Congress by the National Advisory Council on International Monetary and Financial Policies.

We will focus human analysis on a unique collection of several thousand human normal and matched tumour samples from >20 countries, including regions of both high and low cancer risk. Analysis of these samples, together with detailed intervention studies in human populations, mouse models and human organoids, will allow us to develop a roadmap of tumour promotion from single normal cells carrying driver mutations, through to malignant progression. Our findings will facilitate identification of the causative environmental factors that promote cancer and provide routes to new methods and approaches to cancer prevention based on a deeper understanding of the process of initiated cell selection by tumour promoting agents.	\$ 391,529.00	No

Summary by UN System Recipient Entity

UN SYSTEM REGULAR BUDGETS

The U.S. government and UN budget and financial data are collected against different accounting periods. U.S. data is collected according to the U.S. fiscal year (October-September). UN data is available by calendar year, not U.S. fiscal year, so the U.S. percent share calculation is calculated using U.S. fiscal year obligations and UN calendar year total contributions. As a result, the reported USG percentage share may vary due to payment timing across different accounting periods, prepayment of contributions, payment of arrears, and distinct accounting reporting practices of each international organization.

UN PEACEKEEPING OPERATIONS

The U.S. government and the UN account for peacekeeping contributions using different accounting periods. U.S. data is collected according to the U.S. fiscal year (October-September), while the UN peacekeeping financial year runs from July 1 through June 30 of the following calendar year. To address this timing difference, the U.S. percentage share is calculated by dividing the amount of U.S. fiscal year obligations by the total amount to be contributed by all UN member states for each assessment paid in the given U.S. fiscal year.
