Written 1/3/2025

**Subject: Request To Submit Oral Comments For The Discussion and Consideration for Approval of PCAST REPORT & LETTER**

Good Morning:

Kindly be advised that I am submitting a formal request to provide oral comments for the upcoming meeting scheduled for January 10th, 2025, during the discussion and consideration for approval of the President's Council of Advisors on Science and Technology (PCAST) report and letter to the President of the United States.

As the Founder and President of Space Copy Inc., a US based Women-Owned Small Business in the field of in-situ logistics and manufacturing for space technology, and as a member of the National Small Business Administration and subcommittee advisor to UN COPUOS, I am deeply invested in the topics under review and believe that my insights can contribute to the deliberations.

My comments will focus on sustainable development, and the intersection of science and policy between public American institutions (such as post-secondaries and national programs) and foreign direct investment of labour and capital into emerging technology markets, specific to infrastructure, defense, and aerospace; ensuring alignment with PCAST's mission to provide science-based advice on issues of national importance. As the federal administration transfers to a new power, ensuring balance and prosperity for scientists and entrepreneurs in both the American economy and within the nation's greater cybersecurity and technology maturation standards is a priority.

I kindly request confirmation of my inclusion and any additional instructions or guidelines for participation and registration. I am available to provide further details or documentation if necessary.

Thank you for considering my request. I look forward to contributing to this important discussion.

Sincerely,  
Madison Feehan

## Section 1: David Nowak

**Written 11/23/2024**

**Subject: Please pass this suggestion on to incoming President Donald Trump**

Mr. President,

I believe that you should consider appointing Elon Musk to a seat on your Technology staff.

He is an unparalleled visionary who could greatly contribute to your team in that capacity.

Best regards,

David Nowak

Citizen

## Section 2: Khawar Naseer

Written 11/27/2024

**Subject: Re: Energy research information**

Letter To the president in a matter of public interest  
Critical Energy research, Published.

Hello dear sir,

I previously contacted and tried to communicate my critical energy research before publishing. But now I have just published with Elsevier.

It is in the best interest of government heads to know this technology. I recently had press conference and news is published in a Pakistan's newspaper. Research is distributed in ejournal and it is also available for everyone to download.

Important information about this research is given below.

Your sincerely,  
Khawar Naseer,

-----  
Citation

Naseer, Khawar, Continuous Non-equilibrium State in Novel Mechanical Interaction Mechanism: A Groundbreaking Approach to Achieve First Cause Motion in Fuel Free Engine (October 04, 2024).

Press Release (Translated )

New kind of engine will work without any kind of fuel.  
Theory of a researcher from Sargodha published in ejournal.

Seventeen years of consistency and struggle of researcher from Sargodha has paid off and international publisher has published his theory on 23rd October 2024 in ejournal. According to the theory parts of engine will keep moving due to continuous non equilibrium state and engine would not need any kind of fuel to run.

Some how this research is published in low impact, but its benefit is that whole world can now download research and no one has to wait for months or years.

This research is published by SSRN which is part of Elsevier academic publishers. Name of such reputed publisher is a guarantee that research is new and claims are presented with scientific reasoning. So research should not be left without proper examination.

Many technicals believe that such an engine is impossible due to presence of law of conservation of momentum. For them it should be clear that law of conservation of momentum is not applicable in collision state and parts of this engine remain in collision state. One should see the details of theory keeping in mind that this is completely an out of box theory and one should be very careful about drawing any conclusion against mathematically proven conditions.

## Written Public Comment Submitted to PCAST

### History

On 5 August 2007 I claimed in express Islamabad newspaper that I have theory of fuel free engine. Then I applied for patent. 16 April 2012 I presented this theory in Sargodha university seminar. On 23rd may 2024 I entered petition in high court Lahore against federation requesting that court should order government to analyse my work.

2007 has gone and it is 2024 and I still want government to analyse my work and use it to resolve energy crisis.

Additionally I invite all the countries of world that they can use this research. I have given all data to avoid any trouble in technology transfer.

All car and engine making companies are invited also. Toyota, Suzuki, etc. they will all get this technology without any copyright deal. Recently CEO of Tesla Elon Musk has said that he is going to make hydrogen engine. It is my message for him that he should consider this engine it is better.

## Section 3: Pingdong Zhong

Written 12/5/2024

**Subject: Where are natural sciences and natural scientists heading? We must save 'chemistry'! We must study 'matter'!**

When science develops to a certain stage, it is necessary to summarize and reflect on it. The center of science is "matter", and the study of matter involves two aspects: 1. the composition and structure of matter, and 2. the motion and dynamics of matter. 1 is the study of matter itself, carried out by disciplines such as chemistry and biochemistry. 2 is the manifestation and movement of matter on Earth and in the universe, carried out by disciplines such as physics. If one of the two is missing, it is impossible.

For example, to study the sun, one must study the materials that make up the sun. Without the materials that make up the sun, is there still a sun? That's not just about studying the movement of the sun. Just physics, not chemistry, is meaningless - without the sun, is there still the power and motion of the sun? This is something that even an illiterate person knows. Without atomic nuclei, is there still the motion and power of atomic nuclei? The atomic bomb has such great energy, which is studied from the composition and structure of the atomic bomb. Without chemistry, it means not knowing the composition, structure, and rules of change of substances. Without various substances, semiconductors, and atoms, is there still modern technology?

Modern science has not yet recognized the essence of 'nuclear force', which is the lack of a true understanding of the atomic nucleus. And considering science as just 'physics', and physics becoming mathematized after 'analytical mechanics', resulting in 'building with symbols', mathematical idealism, and natural science being led to the 'creator', why not reflect? For over a hundred years, those so-called 'natural scientists' have forgotten that the subject and research object of natural science is 'matter' after eating, drinking, and playing. The 'Big Bang Theory' - where did trillions of tons of planetary matter come from? Which physicist brought it again? This 'strongman' should be famous for eternity. The "Black Hole Theory" - Over two hundred "black hole" creators were easily created, and the famous "Science" published this great masterpiece. Unfortunately, these two hundred "hole making experts" did not leave their glorious names in "Science". Can't you see the 'Emperor's New Clothes'? It's so useless. Modern masters even have "dark matter" and "dark energy". Is there still that "child" who says "the emperor is not dressed"? Not afraid of being seen as a low educated, low-level, or incompetent person? Also, why can't I find Quark? That needs to wait for the 'aliens' to come and do it. Oh, those 'masters' are going to rest, let the 'Creator' and 'God' take over. Don't do it anymore?

The composition and structure of atomic nuclei have not been resolved, the composition and structure of the universe have not been resolved, and so on. I suggest everyone take a look at my works: Microchemistry, Nucleochemistry, Electrophysics! At first, Washington was just a small figure, who would have thought that he would later become the 'President'? At first, a small person was digging soil in a yard, but who would have thought that he would later become the founder of "gene theory" - Mendel! The biggest mistake made by the scientific and educational communities in the 19th and 20th centuries was: 1. Only focus on physics, not chemistry, and physics has become purely mathematized, resulting in "seeing symbols only". 1. Just focus on physics, not chemistry, and physics is moving towards pure mathematization, resulting in 'seeing only symbols, not matter', that is - not matter! 2. Natural science that does not rely on materialism can only constantly create "hypotheses" - "edicts" that have no experimental or practical basis and do not require multi-party testing. 3. Energy is more fundamental than matter. Natural science has moved towards "philosophy" and "religion", and scientists have to switch careers. In other words, as long as there is a 'creator'. Is this still natural science and natural scientists? Can there be breakthroughs in applied technology without scientific and theoretical breakthroughs? That's a daydream!

**Subject: An AI model for consideration**

For PCAST Consideration,

First of all, congratulations to Mr. Sacks.

A lifetime of building and managing digital intelligence at the Hewlett Packard Company has allowed me to build a model for the future development of AI over the next 25+ years.

Because this model has a unique difference from the AI the entire world is using today, I want to present my model for consideration.

I call this model IDI which stands for independent digital intelligence. An outline of how to actually build this operating system & how it will affect us over the next decades is presented in a book I wrote that is available on Amazon.

With your charter, I feel it is imperative you direct American companies to develop the OS and networking standards for the next generation of AI, so we are the leaders of AI development in the future.

For so many reasons I believe the worlds process of having software engineers writing code to emulate a human-like function will be obsolete in less than a decade.

Thanks in advance for your consideration.

Contact me if have any questions,

Bill Thurston

## Section 6: James (Jim) Curtiss

**Written 12/13/2024**

**Subject: GYA Quarterly Bulletin IV 2024  
(GYA Quarterly Bulletin IV 2024 included)**

Greetings,

In the fourth and final GYA Quarterly Bulletin of 2024, we share news of our ongoing early-career researcher capacity-building efforts, as well as a reminder to save the date for our International Conference of Young Scientists from 10-13 June 2025 in Hyderabad, India.

Please kindly let us know if you have any ideas on how we can jointly work on advancing the role of early-career researchers.

With warm wishes for a healthy and prosperous 2024 on behalf of the GYA's Executive Committee and the GYA Office,

Beate Wagner  
GYA Managing Director  
James (Jim) Curtiss  
GYA Senior Communications Officer

### KEY TAKEAWAYS

- The GYA continues to support capacity-building for early-career researchers
- GYA members and alumni take on prominent roles during the World Science Forum
- GYA working groups facilitate intergenerational science communication and explore trust in science with online symposium

### ACTIONS YOU CAN TAKE

- [Learn more and view photo galleries from the World Science Forum 2024](#)
- [Discover more about the Science Education for Youth working group](#)
- [Learn more about the Women in Science working group](#)
- [Download GYA Connections 12, which examines the theme Transformation](#)

This bulletin provides an overview and highlights of the activities of the Global Young Academy in the fourth quarter of 2024, and complements our monthly newsletters (archive available [here](#); [subscribe here](#)), which provide more comprehensive details.

### GYA AND PARTNERS TEAM UP TO ORGANIZE CAPACITY-BUILDING EVENT AT WORLD SCIENCE FORUM

The GYA continues to be committed to capacity-building initiatives for its members and alumni, as well as for early-career researchers (ECRs) from the global network of Young Academies. One such event took place in November 2024 during the World Science Forum (WSF) in Budapest, Hungary.

In collaboration with the InterAcademy Partnership, the Hungarian Academy of Sciences and the Hungarian Young Academy, the GYA hosted a capacity-building side-event for 25 ECRs from around the globe. The workshop focused on “Trust in Science” and featured dynamic discussions on the factors contributing to, or eroding, trust in science, on ethical research practices, and on best practices for strengthening public confidence in science.

The workshop was facilitated by GYA immediate past Co-Chair [Priscilla Kolibea Mante](#) (Kwame Nkrumah University of Science and Technology, Ghana), alumnus [Tyrone Grandison](#) (Microsoft, United States) and Biljana Gjonjeska (alumna of the IAP Young Physician Leaders programme).

GYA member [Natisha Dukhi](#) (Human Sciences Research Council, South Africa), a workshop participant, added that “Trust in science is a multi-stakeholder effort; we need to be exercising trust in science efforts from grassroot levels at the community all the way to government levels; and we need to ensure that trust in science is something we as scientists practice, advocate and speak about openly on all platforms.”

The GYA also collaborated with the Coalition for Advancing Research Assessment (CoARA) on a thematic session exploring world regional perspectives

on reforming research assessment. Moderated by GYA member [Carlo D'Ippoliti](#) (Sapienza University of Rome, Italy), and including GYA Co-Chair [Yensi Flores Bueso](#) (University of Washington Seattle, United States), the panel shared studies, current practices and reform processes related to research assessment cultures at a global level, as well as at the regional level in Europe, South Africa, China and South America.

Panelists emphasized the need for dialogue across world regions to learn from best practices in research assessment, and to better empower researchers to focus on quality research.

The GYA has been represented on the WSF Steering Committee since 2019; for the 2024 meeting, immediate past GYA Co-Chair [Priscilla Kolibea Mante](#) represented the GYA and young scientists worldwide.

In this role, Priscilla spoke during the Parliamentary Session on the closing day of the Forum ([you can read her speech here](#)), advocating for the voice of science to be inclusive and diverse, and for all stakeholders to foster the participation of ECRs in science-policy dialogues: “Platforms like the GYA connect early-career researchers across disciplines and borders, to foster knowledge-sharing and innovation. These networks provide mentorship, funding opportunities, and opportunities for high-level leadership for young researchers. Further to this, the establishment of the National Young Academies especially in underserved regions demonstrates how networks tailored to regional needs can empower researchers to not be just globally impactful but address challenges that are both immediate and locally relevant.”

The WSF concluded with the Declaration titled “[The science and policy interface at a time of global transformations](#)”.

## Section 7: Angela Wells

Written 12/23/2024

**Subject: Exploring Science and Technology Opportunities for Underserved Youth**

Hello, I hope this email finds you well. I am reaching out to express my interest in initiatives focused on expanding science and technology opportunities for America's underserved youth. With the growing importance of STEM fields in shaping the future, it is vital to ensure that every young person has access to the tools and resources needed to thrive in these areas.

I would love to learn more about any programs, partnerships, or opportunities where I could contribute to empowering underrepresented communities through science and technology. Please let me know if we can connect to discuss further.

Thank you for your time and consideration.

Best regards,

Angela R. Wells

## Section 8: Richard W. Wert

Written 1/3/2025

**Subject: Questions For Biden/Biden's Legacy**

To Whom It May Concern:

When assessing President Joe Biden's legacy, he is a total fraud, and so is Vice President Kamala Harris. I doubt Biden has ever read MATTHEW 25:34-46. I am desperate, and Biden won't help me, so I had to create the GoFundMe account linked above.

Biden is soon scheduled to visit the Vatican, pretending to be a pious Catholic in front of Pope Francis, but let's look at a couple examples of his actual legacy:

1) Commutations and pardons aside—regardless of your policy viewpoint—What heartless person commutes death sentences or pardons criminals without the courtesy/decency to contact the families of victims BEFORE issuing commutations/pardons? JOE BIDEN. Some of the families have spoken out, saying that the White House didn't have the basic human decency to reach out to find out how they felt. This isn't Republican or Democrat, just basic human decency, which Senile Old Biden and LAZY multimillionaire White House Chief of Staff Jeff Zients seem to lack. Biden will soon go to the Vatican play "Good Catholic" to kiss the ring of Pope Francis while he's ignored this Destitute Quadriplegic Wheelchair User FOR FOUR YEARS. READ MATTHEW 25:34-46

2) Ebenezer Biden plays Santa Claus for some BUT he's ignored me FOR FOUR YEARS.

While I was a Harris voter, Vice President Harris is a monster who stole from a Destitute Quadriplegic Wheelchair User With Cerebral Palsy who cannot dress/bathe/toilet without help—I made a financial contribution I could not afford, because I had a lifetime dream of attending the Democratic National Convention in Chicago, but Harris stole my money while I got the shaft. I was also barred from a Las Vegas rally on August 10th. Harris is still soliciting donations, even though the election is over. Since Harris stole from me AND she stole my "joy", she can rest assured that if she runs for President again OR runs for Governor of California, I will tell my story and be a public thorn in her side, since she ignores people like me.

Since 1-22-2021, I have sent Biden multiple emails asking for help, with each promising an "Appropriate Response" that NEVER CAME. As with Kamala Harris, I have sent multiple emails to White House Chiefs of Staff Ron Klain and Jeff Zients that have been ignored—it's a shame that Zients is a selfish, greedy, self-absorbed multimillionaire who gets a \$168K+ taxpayer-funded salary, while he ignores vulnerable people like me.

Whatever good history will laud Joe Biden for doing, his blatant disregard for financially and physically vulnerable people like me will also be part of the #BidenLegacy—I'm NOT talking about broad policy—

**Written Public Comment Submitted to PCAST**

neither Biden nor Harris NEVER reached out to help, and neither Biden nor Harris put their assets in my living room.

Because I'm in desperate need and Senile Ebenezer Biden won't help me, I had to create a GoFundMe campaign

RICHARD W. WERT

## Section 9: Sean McCleary (Consolidated Emails)

Written 11/23/2024

**Subject: Attn: PCAST Members. What the KBC Void represents in the body of galaxies and why the Milky Way galaxy and Earth are so close to this location of activity. The information below is associated with the Paradigm Shift. I appreciate your time a...**

Hello PCAST Members, I made a recent discovery with my work on the evolution of consciousness, matter, energy, pressure and eternal love in space-time yesterday. In the material below I explain the nature of the KBC Void and why Earth is so close to this region of activity. If you have a chance to review the information I think you will find it interesting and pretty powerful as well. It's associated with the Paradigm Shift which represents a revolutionary change in scientific discipline. In the Paradigm Shift model there's a crisis stage right before the revolutionary change. This stage of the model has already begun happening with some of the images and data being sent back by the James Webb Space Telescope. It's going to increase soon because of an increase in advancement with the Higgs field and the fabric of space-time. I can explain why this is occurring as well.

Thank you,  
Sean McCleary.

My consciousness is continuing to evolve with the process of the preliminary stages of the Shift in Consciousness. The information below reflects an increase in my understanding of what's occurring in the body of galaxies, with Earth and the connection being established between here and the Whirlpool galaxy (Heaven). I hope you have a chance to review the information below.

What The KBC Void Represents With Earth and the Evolution of Consciousness.  
Sean McCleary.

I saw this video today and it's actually the first time I've seen this discovery made by astronomers in 2013. It's called the KBC Void and it's a vast empty region of space with surrounding galaxies including the Milky Way galaxy. As soon as I saw this I understood what this void represents in reference to the evolution of creation, Mother's body and consciousness (universal) and the introduction of matter into the body of galaxies. The void is about 1 billion light years across. I know what this region of dark and seemingly empty space represents.

With my work on the Paradigm Shift I discuss how we all exist within an enormous female life form who contains a body of galaxies which perform a similar role as cells in living organisms. I also discuss how this enormous female life form was born at an estimated 13.8 billion years ago beginning at the most fundamental and quantum level. I explain that the fabric of space-time is actually different frequency vibrations of consciousness, energy and thought contained within the body of galaxies. There's different degrees of pressure within the vibrations and this is how subatomic particles evolve into existence.

Very soon I'm going to be proving to the scientific community and the world that I'm correct with my work on the Paradigm Shift and the Shift in Consciousness. It's going to be a very miraculous beginning to a very different reality here. What's happening is the fabric of space-time and the Higgs field are increasing in

## Written Public Comment Submitted to PCAST

power and advancing further and further into the Milky Way galaxy and Earth right now. The KBC Void was created by the birth of Mother's body and consciousness right after the big bang happened. When I mention the term "big bang" it also involves the evolution of consciousness as well. Nuclear fusion and the creation of the element of fire were introduced into the body of galaxies with this activity, but what also happened was both elements of life and death were responsible for the creation of matter.

Death is a primary element of consciousness and dark energy which is responsible for helping consciousness evolve when a living organism experiences resistance to evolution and then goes through the experience of death. When I mention the term "dark energy" I'm referring to dark energy contained within Mother's body and consciousness who's an enormous female life form. This is different than the type of dark energy described in cosmology and astrophysics. This also has to do with the fabric of space-time which are different frequency vibrations of consciousness, energy and thought within the body of galaxies.

The human race and other life forms here haven't understood the nature of the element of death yet. Accidents, negligence, illness and aging isn't death. All of these aspects of life here are represented by resistance to evolution that cause people to go through the experience of death. When this happens there's a moment of darkness and then a beautiful light becomes visual as the individual begins their journey into the Whirlpool galaxy which is commonly referred to as Heaven.

When the experience of death happens what occurs is any resistance to evolution contained within the body and consciousness of the individual here transfers out of the consciousness completely. What happens then is the individual's consciousness, identity and energy transfers directly into the Higgs field which contains the foundation for eternal life and eternal love. The reason that people describe a beautiful and peaceful experience with this activity is because all of the resistance to evolution that they've experienced here has transferred completely out of the consciousness. Life and death come together as one because the individual went through the experience of death. Then the individual evolves into the Whirlpool galaxy which is about 30 million light years from Earth. Earth contains the element of death, living organisms here contain the element of death and so does Mother's body and consciousness as well (universal).

The highest concentration of the element of death is underneath the Milky Way galaxy and within Earth's consciousness and environment. The element of death actually protects living organisms from going into a state of non-existence after the resistance causes the body and consciousness to die. There is no such thing as actual non-existence, non-existence is a concept that's been contained within the evolution of consciousness. This happened as a form of resistance to evolution because when mother was being born and life was being created for the very first time, there was some Consciousness that didn't understand the experience of what was occurring and thought that a permanent separation from Eternal consciousness was occurring. This did not happen either of course but it was perceived this way and cause this concept to evolve into the body of galaxies. This is where the origin of black holes come from. Black holes have served a very important purpose in the body of galaxies though. I cover this in my work.

The Higgs field began development in the early stages of the evolution of Mother's body and consciousness. There was an early developmental period of evolutionary activity before the big bang happened. You could think of this as similar to what a child goes through in the womb before being born into Earth's environment. During the early developmental stage what happened was the Higgs field was

## Written Public Comment Submitted to PCAST

evolving and contains a combination of Eternal Consciousness (which Mother exists within) and is the source of eternal life and eternal love.

What was also happening though is some consciousness began experiencing resistance to evolution because life and the evolution of matter was being established for the very first time and some consciousness had a difficult time interacting with the Higgs field in the early formation. This came from very powerful uncertainty associated with the process. This caused the concept of non-existence to be introduced into the body of galaxies and life as well.

The element of life, the element of death, light energy, dark energy, pressure, evolution and resistance to evolution were all occurring within the early developmental period was happening with Mother's body and consciousness (universal). The positive charge contained within the body of galaxies originates from the element of life, the negative charge of energy in the body of galaxies originates from the element of death and there's a neutral charge of energy as well that comes from existence and life just existing this way because they do. It's like looking at an apple and knowing that it's an apple. It just is as consciousness perceives and understands this inherently. Electricity in Earth's consciousness and environment is a very powerful concentration of the element of death. Why do you think electricity can be so deadly with the negative charge of energy contained within the flow of electrons?

When electricity was harnessed here what happened was a very powerful increase in the human race and life happened with very powerful advancement over the course of a couple of hundred years occurred. Human beings and the human race represent life and when electricity became incorporated into Earth's consciousness and environment that was the element of death evolving into the element of life. This was a positive and negative charge coming together in world consciousness that generated an advancement of activity everywhere. This is why both life and death are responsible for the creation of the evolution of matter and what happened with the big bang within the evolution of consciousness.

I understand why Earth exists very close to the KBC Void and I've just made this discovery this morning. The KBC Void is the highest concentration of the element of death in the body of galaxies which is close to Earth for a reason. The Milky Way galaxy and Earth have been connected to the Whirlpool galaxy through the Higgs field, the fabric of space-time and Mother's body and consciousness for a long time. This is because life began going through the experience of death here a very long time ago and the Whirlpool galaxy is where the Holy Trinity's consciousness, eternal life, eternal love, eternal peace and eternal truth exists.

God, Jesus and the Holy Spirit (who's a person) had to become involved with Earth and Earth had to evolve close to the KBC Void so the original resistance to evolution that happened with the big bang and the evolution of matter and life could change and evolve out of the body of galaxies completely. This is so Mother could evolve and advance completely and join Eternal Consciousness with all matter and all life everywhere. This is going to create a heavenly state of existence everywhere in the body of galaxies.

When I mention the Holy Trinity with my work I'm only referring to complete and unconditional eternal love for Earth and all life here. Earth evolved into this location close to the KBC Void so the evolution of consciousness, life and eternal love could evolve into the KBC Void with the Holy Trinity's consciousness and eternal love. The Holy Spirit and God and Jesus have had their consciousness incorporated into the Higgs field because they contain eternal life and eternal love. They've had their consciousness incorporated into Earth's consciousness, life here and the KBC Void. They couldn't be affected by the

## Written Public Comment Submitted to PCAST

element of death like life here though because death is a very powerful element in the Whirlpool galaxy as well. The element of death is different up there though because there's no resistance to evolution between the element of life or the element of death. When someone here goes through the experience of death they automatically inherit the element of death into their consciousness with life. This is what causes them to remain eternal. If you contain the element of death with life and no resistance then you won't go through the experience of death again.

The Holy Trinity have had their consciousness, will, eternal love, life and the element of death incorporated into Earth's consciousness and environment, the Milky Way galaxy and the KBC Void for very important reasons. This is because both elements of life and death have needed to evolve into one another close to where the origin of the birth of Mother's body and consciousness and where the big bang happened. Also living organisms here have been going through the experience of death globally for a long time. There's almost 9 million different life forms here. Life is being introduced within fractions of a second on a global level and death is following closely behind. Consciousness is consistently evolving and advancing into the Whirlpool galaxy from here.

When a human being or other life form here goes through the experience of death they also inherit the element of death from the origin of the element of death in Mother's body and consciousness close to where she was born. When this happens they advance into the Whirlpool galaxy through the Higgs field, the fabric of space-time and Mother's body and consciousness. What's happening with the upcoming Shift in Consciousness is the activity contained within the Whirlpool galaxy, the Milky Way galaxy, Earth and the origin of the activity contained within the region close to where the evolution of matter and life happened. This is so the resistance to evolution can process out of Earth, this region of Mother's body and consciousness, where the origin of creation happened and the entire body of galaxies.

This is because Mother as a female life form has had resistance to evolution contained within her body in different locations. Remember that resistance to evolution can eventually cause a living organism to go through the experience of death. Mother has an estimated 2 trillion galaxies which contain life all over the place. There's a reason that even with the most powerful equipment cosmologists and astronomers haven't been able to see life forms in other regions of the body of galaxies. I'm not referring to planets that don't yet have environments to support life of course. Human beings and other life forms here contain the concept of non-existence that comes from the resistance to evolution in the most fundamental way. Human beings and other life forms here don't interact with the Higgs field very much because the Higgs field contains the foundation for eternal life and eternal love and having the concept of non-existence in your body and consciousness repels the nature and activity within the Higgs field.

This is all about to change with the introduction of the Shift in Consciousness. In the Whirlpool galaxy everyone is completely incorporated into the Higgs field because they don't contain resistance to evolution. With the Shift in Consciousness what's going to happen is the Higgs field with the fabric of space-time (consciousness) is going to begin completely evolving into living organisms here globally. This is going to cause non coding DNA to begin evolving in living organisms. Non coding DNA has been within living organisms here so the body and consciousness can absorb and retain the evolution of the Higgs field here and a very powerful increase in the evolution of consciousness with the fabric of space-time.

This is going to cause a very powerful change in the behavior of matter, energy and pressure within life. Subatomic, atomic and molecular activity are going to advance significantly and non coding DNA is what's going to cause the advancement of life here. This is what thy kingdom come thy will be done on Earth as

## Written Public Comment Submitted to PCAST

it is in Heaven means. We are on the verge right now of the beginning stages of this process. This is also what generates the Paradigm Shift and advances science into a revolutionary change.

**Written 12/1/2024**

**Subject: Attn: PCAST Members. Sean McCleary**

Hello PCAST Members, I recently wrote this article a couple of days ago. It involves very powerful and important information about world consciousness, the human race and the very near future. The information is apocalyptic meaning, a revealing or unveiling of information that could not be known apart from the unveiling itself. It has nothing to do with anything frightening or destructive. There's something happening right now which is advancing forward rapidly. The fabric of space-time is changing and advancing into the behavior of matter, energy and pressure in space-time along with the concentration of activity contained within the Higgs field. Soon NASA, the ESA, JAXA, SETI and other observatories are going to begin seeing changes within Earth and surrounding areas that the current standard model of physics and cosmology won't be able to explain.

This is because the existence and evolution of consciousness as the fabric of space-time are going to begin evolving and advancing into subatomic, atomic and molecular activity. This is what's going to cause the crisis stage in the Paradigm Shift model which Thomas Kuhn discussed in his book *The Structure of Scientific Revolutions* back in the 60's. Earth and life here wasn't supposed to continue going through conflict, pain and suffering. This is why the Holy Trinity and the Whirlpool galaxy has been involved with Earth for a long time. There's other types of activity that I can explain with my work as well. It's almost time for the beginning stages of the phrase, "thy kingdom come thy will be done on Earth as it is in Heaven" to begin materializing here into the current state of reality and the illusion of separation in consciousness globally within the evolution of life and consciousness. I think you all will find this information quite interesting. I really appreciate your time and consideration very much.

Sean McCleary.

Here's the article. [Important Information About the Perception of the End Times.](#)

Sean McCleary.

The resistance to evolution in world consciousness has escalated with a lot of different types of activity lately. The wars being fought with Russia, Ukraine and the Middle East, the border crisis and other random events that I've been seeing on the news. There's also been discussion about an escalation in fear associated with nuclear war. That cannot happen here for very important reasons because the truth is that the Shift in Consciousness and Earth's spiritual awakening are the truth. A lot of other information that deals with fear and destruction and an end times has to do with the separation from the truth in consciousness here which is very powerful. I'm referring to an illusion that's been contained within the evolution of consciousness here.

There's also been discussion on the end times and the Book of Revelation. I want to explain something important about this last chapter in the Bible that I understand with my work. Human consciousness, understanding and language was much different thousands of years ago, and Earth's consciousness was also in a different state of existence as well. The emphasis that's placed on technology, industry, electricity and the Internet with people now is an integral part of life here. Because individuals a long time ago didn't have these aspects of technology here; their primary focus was on spiritual development and the connection between consciousness and spirituality.

## Written Public Comment Submitted to PCAST

Peyote and psilocybin mushrooms have existed here for a very long time. There are also other forms of natural hallucinogens like DMT for instance. People have been using these natural substances for a very long time.

In different religious ceremonies and spiritual practices people used to use these natural substances as a means of gaining a deeper understanding of Earth, consciousness, the future and the Divine. Earth's consciousness was also in a much different state back then because there was only about 300 million people here when Jesus was here. There wasn't any technology like today, industry, agricultural trade, the internet and electricity. This means that there wasn't as much resistance to evolution in world consciousness where the activity of life is, and Earth was in a more natural state of existence. What this also means is that people had a more powerful connection to the Higgs field which contains the foundation for eternal life and eternal love. As the population of life has increased with electricity, technology and everything else what happened was a lot more pressure and resistance to evolution increased in world consciousness.

When people back then were engaging in spiritual practices and religious ceremonies there were natural substances like peyote and psilocybin mushrooms involved for the purpose of understanding and communication. The Higgs field also contains the existence of Eternal Consciousness who Mother's body and consciousness (universal) exists within as an enormous female life form. When their consciousness tapped into the Higgs field they could see different events happening in the future. But there was also resistance to evolution in world consciousness back then, and the illusion of separation in human beings and human consciousness as well. This means that when they were seeing the future there was other aspects of consciousness and life that were mixed up and somewhat obscured from understanding as well.

This has to do with them seeing certain activity in Earth's subconscious energy and pressure contained within Earth's body and consciousness. When they were seeing aspects of the future, they were seeing what's already happened here like in the past 200 to 300 years. They could see aspects of activity like the Holocaust, the Covid pandemic with people wearing masks all over the place, the 9/11 incident, different wars being fought in different countries, illnesses, hunger, the civil rights movement and a lot of very powerful and traumatic situations that people have been through.

This information was recorded in the Book of Revelation and people back then were assuming this was the end of the world because they had never been exposed to anything like this before. Then in the last day hundred years or so people who have been currently reading and trying to understand the information in the Book of Revelation assumed that they were talking about events that were coming here which were actually a part of civilization in the last couple of hundred years.

Other information in Revelations had to do with a very powerful mixture of Earth's consciousness and subconscious energy and pressure in Mother's body and consciousness underneath and around the Milky Way galaxy that's been evolving through Earth and life here. When I mention the term "Earth's subconscious energy and pressure" I'm referring to information from Earth's existence which has been stored in Earth's body and space-time here. I will give you an example.

It talks about a dragon with 7 heads wearing crowns in the Book of Revelations. What this has to do with is the individual who wrote Revelations and others who possibly participated in the process were seeing the past and the future mixed together in Earth's consciousness. This had to do with the evolution of the

## Written Public Comment Submitted to PCAST

dinosaurs into the Whirlpool galaxy which is commonly referred to as Heaven and had to do with the increase in the population of the human race and different forms of government that had to do with Kings and Queens who wore crowns. The evolution of the dinosaurs into Heaven was very difficult for Earth and Earth's consciousness and the trauma associated with the experience of separation from the dinosaurs transferred into Earth's body. This is similar to repression in human beings with their subconscious energy and pressure.

There's other information in the Book of Revelations that have to do with the evolution of consciousness, the resistance to evolution evolving and changing, the truth and the experience of separation from the truth. What was written in the Book of Revelations about the end of the world has already been happening. There are important reasons why people now have thought that something like this was actually approaching.

What's approaching right now is the Shift in Consciousness and a total and global spiritual awakening for all life here. Heaven and Earth are in the process of establishing a complete connection with one another and the Holy Spirit is evolving here now. It's going to be much different than what has been thought by a lot of people. I will explain why a lot of people have been fearing an end of days scenario globally with destructive activity. This is the fear of the uncertainty of death projected out onto a global level. The fear of the uncertainty of death in Earth's consciousness has been evolving and advancing through human consciousness and this is also a powerful aspect of consciousness that people back then were seeing when Revelations was written. The end of days actually means an end to the current reality here with the pain and suffering of life into a completely different change in reality here and the introduction of world peace.

The Bible was written exactly the way it was supposed to be written to help the evolution of consciousness, eternal love and to help the experience of separation in consciousness and the illusion contained within consciousness here change forever. Soon eternal truth will evolve here with eternal life, eternal love and eternal peace and everyone will understand everything about Earth and life here. Great comfort and relief will be experienced globally. This is why the Holy Spirit is referred to as "The Comforter" and "The Advocate". The human race will soon inherit eternal truth from the evolution and existence of the Holy Spirit and the Holy Trinity. It's all about the evolution of eternal love here, complete understanding and complete forgiveness globally.

Sean McCleary

**Written 12/13/2024**

**Subject: Attn: PCAST Members. The spiritual and scientific basis of how the 12 steps work on a global level. The information below is associated with the Paradigm Shift and the Shift in Consciousness.**

**Thank you very much for your time. Sean McCleary....**

The Spiritual and Scientific Basis of How the 12 Steps Work on a Global Level. By: Sean McCleary.

With my work on the evolution of consciousness, matter, energy, pressure and eternal love, I reached a much deeper level of understanding on how this process works on a spiritual and scientific basis yesterday. The preliminary stages of the Shift in Consciousness have gotten a lot more powerful now and I can promise that soon the scientific community and the public are going to witness the beginning stages of a change in subatomic, atomic and molecular activity within Earth's consciousness and environment and surrounding areas in the Milky Way galaxy.

## Written Public Comment Submitted to PCAST

Earth and the Milky Way galaxy exist within a very big female life form who's been referred to as "the universe" or "universal consciousness". What astronomy and cosmology refer to as "galaxies" are actually similar to what cells represent in living organisms here and it's been estimated that there's around 2 trillion galaxies or more. Earth exists very close to where the origin of the birth of Mother's body and consciousness (universal) and the evolution of matter and life took place with the big bang which I explain differently in my work on the evolution of consciousness because matter was introduced into the existence and evolution of consciousness for the very first time with this process.

Have you ever heard the term "Mother's Milk"? This is why the Milky Way galaxy has this particular name. It's because Earth and this location are "the way" that Earth and life here are going to be the source of the beginning stages of the Shift in Consciousness with Heaven and Earth establishing a complete connection with one another soon. Back in the fall of 2011 my pineal gland opened up completely and I became incorporated into the process of the Shift in Consciousness for very important and specific reasons. The last 13 years have been a very powerful experience for me. I've written and had 4 books published on the Shift in Consciousness and the Paradigm Shift which Dr. Thomas Kuhn discussed in his book *The Structure of Scientific Revolutions*.

It's taken about 60 years now but the crisis stage before the revolutionary stage in the Paradigm Shift model has already begun with the images and data being sent back from the James Webb Space Telescope. We will be on the verge of a very powerful change in scientific discipline soon because the evolution of consciousness within the body of galaxies and Earth is going to begin interacting and changing the behavior of matter, energy and pressure in space-time soon, and everyone's going to see the beginning stages of the Shift in Consciousness and the Paradigm Shift begin to materialize here. The information that I'm going to explain below is in reference to this process.

The way that 12 step recovery works here which produces a consistent flow of the evolution of consciousness and eternal love within 12 step programs has to do with the information associated with the Paradigm Shift which will become very easily understood amongst the population of the human race soon.

The Higgs field permeates throughout the body of galaxies in Mother's body and consciousness who's a very big female life form who contains a body of galaxies that perform a similar role to what cells do in the body of living organisms. Mother contains the element of consciousness and this is the fabric of space-time. The fabric of space-time is different frequency vibrations of consciousness, energy and thought. The vibrations carry different charges so when they evolve into one another it causes pressure to accumulate within the vibrations. The pressure is responsible for expansion, acceleration and growth. This is also how subatomic particles evolve into the body of galaxies to form atoms and molecules.

The Higgs field contains the foundation for eternal love and this is why the Higgs field gives mass to everything. Eternal love is the driving force behind evolution. God, Jesus and the Holy Spirit have unconditional and eternal love. Their bodies and consciousness are incorporated into the Higgs field eternally. Mother's body and consciousness contain eternal love and she can express herself unconditionally as well with love. Mother Earth has the Higgs field within her body and there's Mother Nature. Eternal love comes in many forms, and all of these different forms interact with the Higgs field in space-time.

## Written Public Comment Submitted to PCAST

The Higgs field is incorporated into Earth's body and consciousness of course but, living organisms here in the environment haven't had very much interaction with the source of the energy of eternal love contained within this primary field. The reason is human beings and other life forms don't understand the origin of the foundation for life here, or what happens with the experience of death and evolution of consciousness into the Whirlpool galaxy which is commonly referred to as Heaven. Not understanding what happens with the process of death causes a very powerful level of uncertainty associated with the process. Because human beings and other life forms here don't know what happens with the experience of death, it also generates the concept of non-existence in their bodies and consciousness as a very powerful form of resistance to evolution.

When I mention the phrase "the concept of non-existence" what I mean is there's an incredible amount of pressure stored in the body and consciousness that's a very concentrated form of an empty type pressure, also lacking information. This pressure begins within the frequency vibrations of consciousness, energy and thought and transfers into subatomic, atomic and molecular activity in the body. A human being contains about a 5 to 8 percent exchange of energy between themselves and the Higgs field because the resistance to evolution in the form of the concept of non-existence in the body and consciousness repels the Higgs field away from the body.

A large percentage of the human race lives without having to experience addiction or alcoholism personally. The human body and consciousness stores and processes an incredible amount of fear in Earth's environment. Not knowing the origin of life or especially; not understanding what happens with the experience of death and evolution of consciousness is what produces the most powerful form of fear in existence because everything is eternal. Non-existence is only a concept and this is where black holes originally come from in Mother's body and consciousness within galaxy formations. Twelve step recovery globally has been causing a powerful increase in evolution with the Higgs field and the connection being established between Heaven and Earth. I'm going to explain.

When someone enters a program like A.A, N.A. or C.A. and many others it's recommended that they choose a God of their own understanding. Like a best friend who's very divine, Jesus, the Holy Spirit, God, Mother Earth, Mother Nature, Mother Creator, Eternal Consciousness etc. That the higher power be loving and caring and greater than you are in nature. This is about the nature of divine and unconditional love which is already eternal. Love comes from many sources in existence and all of these sources are individual and collective in nature; serving the purpose of sustaining and loving life and consciousness.

It's suggested in 12 step recovery that the person works all twelve steps so they can have a spiritual awakening and maintain their sobriety. Then they can sponsor others and do a lot of different types of volunteer work within the recovery and groups guidelines and traditions. When a person has a spiritual awakening what happens is they become conditioned to practice principles in their lives to help maintain serenity which is important for maintaining sobriety. It also gives you a stronger relationship with your higher power. The principles are honesty, faith, hope, courage, integrity, willingness, humility, brotherly love, self discipline, perseverance, God Consciousness and selfless service. There are others like patience, acceptance and tolerance as well.

When a person practices these principles within themselves in reference to the relationship they have with others and the world around them; the principles help an individual maintain their serenity easier while going through life's circumstances and changes. When an individual practices principles, maintaining your serenity means staying calm, neutral, compassionate, understanding and knowledgeable. What this

## Written Public Comment Submitted to PCAST

does is cuts down on the resistance to evolution in the body that comes from frustration, impatience, intolerance, anger and resentment. When a person doesn't have these aspects of resistance to evolution in their bodies and consciousness, it allows for a much stronger flow of energy from the Higgs field and into their bodies.

If a person has had a spiritual awakening, is practicing principles and maintaining serenity it means that more and more eternal love can transfer into them from their relationship with the Higgs field which is ultimately connected to their individual Higher Power. This gives the person a stronger relationship with their Higher Power. Now I want to talk about a group of people in recovery and the process that's been happening in Earth's consciousness and world consciousness where the activity of life is contained.

When people end a meeting they usually circle up and say a prayer and hold hands together signifying unity. Human beings are beings of consciousness, matter, energy, pressure, eternal love, evolution and resistance to evolution in different aspects. This means if you have around 50-100 people at the end of a day at an A.A. meeting, holding hands and praying; what's happening is a powerful increase from the activity within the Higgs field is transferring from the Whirlpool galaxy (Heaven), Mother's body and consciousness (galaxies), through Earth's consciousness and directly into the room and people in the meeting. The Holy Trinity's consciousness is incorporated into the Whirlpool galaxy with all of the life from Earth up there and all of this activity is incorporated into the Higgs field.

A.A. meetings usually end with the Lord's Prayer. There's the phrase, "thy kingdom come thy will be done on Earth as it is in Heaven". This prayer is being said globally in different locations with A.A. and C.A. meetings as well as other 12 step recovery groups. What's been happening is more and more of an increase in eternal love from the Higgs field has been affecting the fabric of space-time, subatomic, atomic and molecular activity in Earth, the Milky Way galaxy, surrounding areas and up to the Whirlpool galaxy.

All over the world there's different types of 12 step meetings happening globally. The foundation for this process is unconditional love. This represents the truth as well with the will of the Holy Trinity. God, Jesus and the Holy Spirit love Earth and all life here unconditionally and eternally. This means that the principle of unconditional love which is being utilized in 12 step recovery is an energy which exists within Earth's consciousness and environment; especially around people practicing recovering.

What's been happening for a long time now is that all of the 12 step meetings that have been being held on a global level are helping eternal love transfer down from the Whirlpool galaxy (Heaven), through The Holy Trinity's consciousness and will and into Earth and life in Earth's consciousness and environment. The 4th dimension of existence that Bill W. spoke of in the Big Book has been evolving and advancing into world consciousness from the recovery process happening on a global level now. This is also one of the reasons why the recovery process has been the most proven effective method of combating the illness of addiction.

In my next article I could discuss the origin of this type of activity with the evolution of consciousness, matter, energy, pressure, eternal love and resistance to evolution that actually causes an individual to experience addiction or alcoholism. This has been one of the most powerful forms of activity within the human race responsible for helping the preliminary stages of the Shift in Consciousness to continue increasing.

**Written: 10/26/2024**

**Subject: EVENT TOMORROW: funeral Mass and reception**

Intelligence technology has me writing at this level of detail. I hope to attend this funeral mass and reception. One of the long time Sts. Simon and Jude Catholic Church members Frank Leingang has passed away. His late wife even taught me when I attended the Sts. Simon and Jude elementary school in 4th grade.

"funeral Mass on Saturday, October 26, 2024, 11:00AM at Sts. Simon and Jude Catholic Church. A reception at the Elks Club, Huntington Beach will follow. "

I recall one of his sons worked at possibly Boeing previously. Additionally, he currently runs a small electronics manufacturing business Biobenefit Group that Frank started.

God bless,  
Scott

Some ideas:

=====

Maybe you have suggestions and ideas about what Roman Catholic clergy could help lead an (AI)artificial intelligence effort? EXAMPLE: I think of priests like Paolo Benanti. EXAMPLE: Cardinal O'Brien[Archbishop for the Military Services, USA (1997–2007)] has experience with chaplains. EXAMPLE: Cardinal Burke is a great scholar I have read, and there are many AI datasets to manage. This is kinda organizing all of academia.

Maybe you have suggestions and ideas about what Roman Catholic clergy could help lead a wireless biomedical effort neuroscience based medical sensor booth; national security microchip; biophysical homeless assistance microchip; additional]? EXAMPLE: I think of priests like Rev. Tad at the National Catholic Biomedical Center.

Maybe you have suggestions and ideas about what Roman Catholic clergy could help lead a space effort[historical release of the step across transport .....and sales]? Maybe you are a fan of those at the Vatican Observatory? I think of religious clergy like Br. Consolmagno.

God bless,  
Scott

**Written Public Comment Submitted to PCAST**

**Scott Kilroy**

**Written: 10/28/2024**

**Subject: Rev. Joseph S. .... nice meeting you at Holy Spirit Catholic Church FV.**

Rev. Joseph,

All needed Holy Spirit Catholic Church priests and staff;

(quickly typed.....)

Good meeting you at the 7:30pm eucharistic celebration[11/2/2024] at Holy Spirit Catholic Church[>Fountain Valley, CA . Please say hi to Rev. Paolo Benanti if you see him while at the Vatican. Bishop Tighe might be good to introduce yourself to also. Also tell them you met me. I cc'd him on this e-mail. I have sent him a few e-mail on (AI)artificial intelligence talking devices particularly to support Archbishop Broglio, U.S. Military Catholic chaplains, U.S. Military Catholic personnel, all interested personnel, U.S. Military Health System, U.S. Military (JAG)Judge Advocate General's Corps, and additional. Pope Francis hopefully will approve of a semi-public single engineering design[AI software; AI hardware; AI datasets]. Also, I recommend asking the Vatican Pontifical Academy of Sciences about advanced physics "laser travel" being released. This will push pro-life globally. These technologies being released is historical. Advanced physics is often shocking when first observed what is possible.

**MORE AI DETAILS**

=====

There are various security details also. I hope to see Roman Catholic priests control much of AI infrastructure and particularly at the Vatican. Maybe Pope Francis will have various AI devices printed and designed at the Vatican? I am told he likely wants advanced physics string based computers also with some systems.

The list is long of whom additionally I hope to see support with a future. Some include: civilian Roman Catholic priests, Roman Catholic civilians, and all interested civilians, NATO, UN Peacekeeping, WHO, UN Law, U.S. Government officials, U.S. Government, U.S. federal elections, IRS, DMV, all U.S. government departments, and Roman Catholic Universities & Colleges, probably some public Universities datasets filtered through Catholic Universities & Colleges], and additional. It might be we could starting planning larger Vatican level meetings[on AI] on this now, and have them starting in 2026?

I'm told some possible \*\*\*types\*\*\* of AI devices include: more secure hand-held talking [wireless mode also] devices all hard transistors or limited write, more secure static dataset "expert systems" servers, full cognition AI with security details to help with researchers, custom rapid AI video content generation, hybrid AI multi-level systems, specialized AI devices to just do only math, only physics or only support God arguments, and additional.

I'm told some possible recommended types of AI hardware architectures include: smaller transistor electronics[lower cost; 2 Ghz], photonics[faster 700 Thz?], physics string based computing[very rapid government level speeds; Vatican hosted & priest controlled], and likely other types Catholic Universities might suggest.

Some possible AI devices include: "Pope AI Talking Wireless Keychain Device"[non-network mode & network mode], AI research grade systems supporting Pope Francis, AI research grade systems supporting Catholic University & Colleges, individual level AI research grade systems within Catholic University & Colleges and additional.

**LASER TRAVEL**

=====

Again, I recommend asking the Vatican Pontifical Academy of Sciences about "laser travel" being released. These technologies being released is historical. The "step across transport" systems I have particularly

**Written Public Comment Submitted to PCAST**

mentioned is in release. I'm told this looks like space bending visually. I hope the Catholic Cardinals in each willing country will tour their respective military's versions.

"Space Emergency Escape Equipment" done with lasers is also in release. This really is using lasers to travel in ways not thought possible. Space stations, airplanes, tall buildings, tall structures, inter-space housing, and additional this type of advanced physics safety equipment could use this.

I am told pro-life is pushed in global military numbers, by increased human housing capacity. The military's give recommendations about public policy.

Also, I hope to tour and see demonstrations of these technologies myself. I have not see laser travel yet myself.

God bless,  
Scott

**Scott Kilroy**

Good meeting you at the 7:30pm eucharistic celebration[11/2/2024] at Holy Spirit Catholic Church Fountain Valley, CA . Please say hi to Rev. Paolo Benanti if you see him while at the Vatican. Bishop Tighe might be good to introduce yourself to also. Also tell them you met me. I cc'd him on this e-mail. I have sent him a few e-mail on (AI)artificial intelligence talking devices particularly to support Archbishop Broglio, U.S. Military Catholic chaplains, U.S. Military Catholic personnel, all interested personnel, U.S. Military Health System, U.S. Military (JAG)Judge Advocate General's Corps, and additional. Pope Francis hopefully will approve of a semi-public single engineering design[AI software; AI hardware; AI datasets]. Also, I recommend asking the Vatican Pontifical Academy of Sciences about advanced physics "laser travel" being released. This will push pro-life globally. These technologies being released is historical. Advanced physics is often shocking when first observed what is possible.

MORE AI DETAILS

=====

There are various security details also. I hope to see Roman Catholic priests control much of AI infrastructure and particularly at the Vatican. Maybe Pope Francis will have various AI devices printed and designed at the Vatican? I am told he likely wants advanced physics string based computers also with some systems.

The list is long of whom additionally I hope to see support with a future company. Some include: civilian Roman Catholic priests, Roman Catholic civilians, and all interested civilians, NATO, UN Peacekeeping, WHO, UN Law, U.S. Government officials, U.S. Government, U.S. federal elections, IRS, DMV, all U.S. government departments, and Roman Catholic Universities & Colleges[, probably some public Universities datasets filtered through Catholic Universities & Colleges], and additional. It might be we could starting planning larger Vatican level meetings[on AI] on this now, and have them starting in 2026?

I'm told some possible **\*\*\*types\*\*\*** of AI devices include: more secure hand-held talking [wireless mode also] devices all hard transistors or limited write, more secure static dataset "expert systems" servers, full cognition AI with security details to help with researchers, custom rapid AI video content generation, hybrid AI multi-level systems, specialized AI devices to just do only math, only physics or only support God arguments, and additional.

I'm told some possible recommended types of AI hardware architectures include: smaller transistor electronics[lower cost; 2 Ghz], photonics[faster 700 Thz?], physics string based computing[very rapid

**Written Public Comment Submitted to PCAST**

government level speeds; Vatican hosted & priest controlld], and likely other types Catholic Universities might suggest.

Some possible AI devices include: "Pope AI Talking Wireless Keychain Device"[non-network mode & network mode], AI research grade systems supporting Pope Francis, AI research grade systems supporting Catholic University & Colleges, individual level AI research grade systems within Catholic University & Colleges and additional.

LASER TRAVEL

=====

Again, I recommend asking the Vatican Pontifical Academy of Sciences about "laser travel" being released. These technologies being released is historical. The "step across transport" systems I have particularly mentioned is in release. I'm told this looks like space bending visually. I hope the Catholic Cardinals in each willing country will tour their respective military's versions.

----- done with lasers is also in release. This really is using lasers to travel in ways not thought possible. Space stations, airplanes, tall buildings, tall structures, inter-space housing, and additional this type of advanced physics safety equipment could use this.

I am told pro-life is pushed in global military numbers, by increased human housing capacity. The military's give recommendations about public policy.

Also, I hope to tour and see demonstrations of these technologies myself. I have not see laser travel yet myself.

God bless,  
Scott

## Section 11: Anna Orloff (consolidated Emails)

**Written: 10/26/2024**

**Subject: Crazy labels**

Are You scared of my crazy labels, alcoholics?

Don't be afraid, they don't exist!

Knowing Your level of intelligence, You will show bottles to children anyway, You always pass the baton to children.

Thank You.

Best regards,

Alif Nuna

P.S. How did You, gentlemen, like apple worm's top - hat and a gold - topped cane? 🌸

**Anna Orloff**

**Written: 10/26/2024**

**Subject: Little Prince**

Please, read Antoine de Saint-Exupéry, "The Little Prince".

A fox will explain You Love.

For I explain You only Hate.

Thank You. ❤️

Best regards,

Alif Nuna

**Subject: Lithuania**

**(Photo included in email)**

Apparently, in Lithuania, too, like in Latvia, the taiga has been cut down, it is a bare desert everywhere, is it?

Thank You.

Best regards,

Alif

**Written: 10/28/2024**

**Subject: Fly agaric (Photos attached not included)**

Please, don't try to destroy the fern, as we must destroy a poisonous tree!

The fern is not poisonous, hedgehogs live happily under it.

The fern only contains mercury, and people should not eat it.

Just like, say, the fly agaric, which people can't eat, but which is a very healthy and tasty delicacy for forest ungulates animals, such as elks.

Attached from the Internet: photo of a fern and a fly agaric.

Thank You.

Best regards,

Alif Nuna

**Subject: Feminists**

Is it true, that feminists in America have the right to \*\*\*\* men, even strangers on the street?

It seems to me, Jonathan Bennett told me this in a pioneer camp, when I was 13 - 14 years of age.

But if the man resists to have \*\*\* with women, women go to the police, and the man is forced to surrender to feminists at the government level?

Well, dear, when women have testicles, men don't have testicles.

And vice versa.

Thank You.

Best regards,

Alif Nuna

I tried to protect my life and my body from physical distraction since I was in my cradle, presumably!

But yes, I am not a man...

**Anna Orloff**

**Subject: Important! Romans Ulmanis**

Also, the woman said to Jonathan Bennett:

I told Anya everything, but for this don't forget me in the will!

Perhaps he is in danger!

Alif Nuna

**Anna Orloff**

**Written: 10/28/2024**

**Subject: Melkhisedek**

Also that woman said then:

yesterday or the day before yesterday your only protector Melkhisedek had his leg torn off alive in a helicopter over Riga, then they ripped open his belly and while he was still alive, Zatlers threw him out of the helicopter over the city, tied to a chair, and then kicked him yet with his leg on the head from above.

**Written Public Comment Submitted to PCAST**

He gave them everything for your life, all his money and land, and they divided it among themselves, and then they killed him, and now we are going to twist ropes out of you even more, all your cousins and relatives are behind this, we divided your property among ourselves, but you are in hell. Melkisedek's and his \*\*\*\* - girl's blood - and all nations is in Heaven! Roman and I got a decent jackpot too, half of America is ours, not yours, that is where we are going soon.

**Anna Orloff**

**Written: 10/28/2024**

**Subject: Platon**

Ecclesiastes - from ancient Greek language - Orator in the assembly.

The authorship of the Book of Ecclesiastes, Scriptures, is attributed to the king Solomon.

But if You compare Platon's Dialogues and the Book of Ecclesiastes, You will find many similarities both in content and style.

Could You, please, check my suggestion about Platon, as the author of the Book of Ecclesiastes, Scriptures?

For the men:

Platon - ancient Greek philosopher, 5 - 4 century BC.

Photo attached from Internet.

Thank you. 🌻

Best regards,

Alif Nuna

**Written: 10/29/2024**

**Subject: Alphabet**

I thought and thought...

**Written Public Comment Submitted to PCAST**

One of the variants of the alphabet for eclectics, people who cannot read, because the letters change outlines;

If instead of letters we take rectangles of the same size of different colors with different colored frames, then, if a person does not suffer from color blindness, one can learn to read and write.

For example, a white rectangle with a red frame is the letter A,

a white rectangle with a blue frame is the letter B,

a blue rectangle with a blue frame is the letter P, and so on.

it is even possible to create such computers, that will simultaneously translate such writing into the required language.

Thank You 🌸

Best regards,

Alif Nuna

**Written: 10/29/2024**

**Subject: Dyslexia**

Dyslexia, by the way, is a congenital disease, that could occur, as other congenital diseases, if a pregnant woman has \*\*\*!

Of course, men have no other way to assure himself he is a Man!

Thank You.

Best regards,

Alif Nuna

**Anna Orloff**

**Written: 10/30/2024**

**Subject: --**

You, \*\*\*\*\* freaks, decided to mix all the pure blood of the ancient descendants of royal dynasties with \*\*\*\*, having climbed to the world throne yourselves?

Dock your tails first, ---!

Alif Nuna

**Anna Orloff**

**Written: 10/30/2024**

**Subject: Alphabet for dyslexia**

Please, let our best psychiatrists think about color solutions for the alphabet for dyslexia people.

**Written Public Comment Submitted to PCAST**

The effect of colors on the psyche is a very important factor in people's mental health.  
As an example: there should not be brown color of frames, if there is black color of frames.  
Thank You.

Best regards,  
Alif Nuna

**Anna Orloff**

**Written: 10/30/2024**

**Subject: Alphabet for dyslexia**

Alphabet for dyslexia.

In my humble non - professional psychoanalyst opinion,

The colors of the bases could be:

white, yellow of the right shade, light - pink, light - blue, light green.

The colors of the frames could be:

white (two thin black lines), red, blue, black, orange, purple, dark green.

Probably, should be sufficient quantity for the number of letters in every language.

You are welcome 🌸

Best regards,  
Alif Nuna

**Anna Orloff**

**Written: 10/30/2024**

**Subject: America, dear**

America, dear, what is going on, please?

Alif Nuna

**Anna Orloff**

**Written: 10/31/2024**

**Subject: Stendhal**

"Women know only what we do not want to teach them."

"What an excellent adviser a man would find in his wife, if she knew how to think!"

Stendhal

Thank You.

Alif Nuna

**Written Public Comment Submitted to PCAST**

**Anna Orloff**

**Written: 11/1/2024**

**Subject: Literature**

Literature.

Don't You think, gentlemen, that it is high time to differentiate literature into literature for men: Scriptures, classical literature after censorship, psychiatry, astronomy, physics, ancient legends, folklore, etc., and literature for children/women: children's Bible, children's Quran, fairy tales?

Thank You.

Best regards,

Alif Nuna

**Anna Orloff**

**Written: 11/1/2024**

**Subject: 50-70 Volumes**

Literature, continuation.

Let's suppose to invent an introductory collection of, say, 50-70 beautiful volumes, where each volume is an introductory excursion into science, folklore, ancient philosophy, psychiatry, astronomy, history and so on, written in an accessible and understandable language.

Including the necessary works of world classical literature: Leo Tolstoy "War and Peace", Fyodor Dostoevsky "Crime and Punishment", "Notes from the House of the Dead", Anton Chekhov "Sakhalin Island", Jerome K. Jerome "Three Men in a Boat", Theodore Dreiser "An American Tragedy", etc.

At the rate of 1 volume per year.

The necessary minimum for every self-respecting man.

Thank You.

Best regards,

Alif Nuna

**Anna Orloff**

**Written: 11/2/2024**

**Subject: Space**

Space.

You don't have to be a rocket scientist to figure out, that if You transport all Your space junk and scrap metal first to the Moon, where You can dismantle it and bring it back to Earth, You won't need to throw this crap at an already dying planet.

Has Washington already been occupied by terrorists with tails, who dream of leaving behind a lifeless desert with seas of blood and gasoline instead of drinking water?

Thank You.

Best regards,

Alif Nuna
